## NRC Hosting Forum on Risk-Informed Decision Making September 12

The Nuclear Regulatory Commission is hosting a [forum](#) September 12 on the benefits of using risk insights to support decision making for operating, new, and advanced reactors. The hybrid event will take place at the agency's headquarters in Rockville, Maryland, and will be webcast for online attendees, from 9 a.m. – 4:30 p.m. Eastern time.

The forum will be held in the Commission Hearing Room in One White Flint North, 11555 Rockville Pike in Rockville for those participating in person. Virtual participants can attend using this [link](#).

Forum participants will examine how risk-informed decision making is applied to nuclear power plant activities. Specific topics will include current risk-informed decision-making successes at the NRC and elsewhere; managing uncertainty; incorporating risk-informed decision making into an organization's culture; and applying risk to licensing of operating, new and advanced reactors. Presenters will include NRC staff and representatives of federal agencies, industry and academia.

Those interested in attending in person should send an e-mail to Leslie Fields at [leslie.fields@nrc.gov](mailto:leslie.fields@nrc.gov).
