MICHAEL PECK NAMED NRC SENIOR RESIDENT INSPECTOR AT CALLAWAY

Nuclear Regulatory Commission officials in the Region IV office in Arlington, Texas, have selected Michael Peck as the Senior Resident Inspector at the Callaway nuclear power plant in Steedman, Missouri.

Peck joined the NRC's Region III (Lisle, IL) office in 1990. He served as the Resident Inspector at Dresden Station in Morris, Illinois until transferring to the US Department of Energy in 1993. While at DOE, he served as facility representative at the Hanford Nuclear Reservation in Richland, Washington. Peck returned to the agency in 2000. Since returning, Peck has served as the Resident Inspector at the Columbia Generating Station and worked as a reactor engineer in the Region's Division of Reactor Projects.

Prior to his NRC service, Peck worked as a reactor engineer at the Browns Ferry and Clinton Nuclear Plants and as a shift technical advisor at the Sequoyah Nuclear Plant. He earned a bachelor of science degree in chemical engineering and a master of science in nuclear engineering from the University of Missouri-Columbia. Peck and his family live in Columbia, Missouri.

Every U.S. commercial nuclear power plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and writing periodic reports which are available to the public.

The NRC resident inspectors at Callaway can be reached at 573-676-3181.
