NRC ASSIGNS NEW RESIDENT INSPECTOR TO SALEM NUCLEAR PLANT

Nuclear Regulatory Commission officials in the Region I office in King of Prussia have selected George J. Malone as a resident inspector at Salem Station, in Hancocks Bridge, N.J. He joins Senior Resident Inspector Daniel Orr at the two-unit nuclear power plant site. Malone replaces Fred Bower who was reassigned as a region-based inspector.

Malone joined the NRC in March 2002 as an operations engineer in the Region I Division of Reactor Safety. Prior to joining the agency, he worked as an engineer at Bechtel-Bettis, Inc., in Charleston, S.C. He has a master's and a bachelor's degree in nuclear engineering from the University of Illinois.

Each U.S. commercial nuclear power plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and interacting with plant workers and the public.

The Salem resident inspectors can be reached at 856/935-5151.
