NRC TO PRESENT PRELIMINARY INSPECTION RESULTS FOR SEQUOYAH NUCLEAR PLANT SHUTDOWN AT PUBLIC MEETING ON SEPTEMBER 4

U.S. Nuclear Regulatory Commission officials have scheduled a public exit meeting for Thursday, September 4, to present preliminary results from the inspection team reviewing the circumstances surrounding an August 28 shutdown and alert declaration at Unit 1 of the Tennessee Valley Authority's Sequoyah nuclear plant northeast of Chattanooga.

The meeting will be held at 1:00 p.m. (EDT) in the Sequoyah plant nuclear training building on the Sequoyah site, located at 2600 Igou Ferry Road near the town of Soddy-Daisy. It will be open to public observation, and NRC officials will be available prior to the close of the meeting to answer questions from interested observers.

The NRC inspection team will also issue a formal written report, which will be publicly available, within a few weeks.
