NRC TO MEET WITH EXELON GENERATION COMPANY TO DISCUSS PERFORMANCE OF CLINTON NUCLEAR PLANT

The U.S. Nuclear Regulatory Commission staff will meet with representatives of Exelon Generation Company on Thursday, April 8, to discuss the results of the agency's assessment of safety performance at the Clinton Nuclear Power Plant during 2003. The facility is located near Clinton, Illinois.

The meeting will be held at 1 p.m. at the Vespasian Warner Public Library, 310 N. Quincy Street, in Clinton. The public is invited to observe the meeting, and NRC officials will be available before the conclusion of the meeting to answer questions from the public. In addition, the NRC staff will provide an overview of how the agency's Reactor Oversight Process works.

The NRC concluded that the plant operated safely last year. All NRC inspection findings during the year were of very low safety significance. This inspection record and the plant's performance indicators (statistical data measuring safety performance) led the agency to conclude that the Clinton plant does not require NRC oversight beyond the normal routine inspection program.

Routine inspections are performed by the two NRC resident inspectors assigned to the plant and by inspection specialists from Region III office in Lisle, Illinois.

A March 4 letter from the NRC to Exelon officials addresses the performance of the plant during 2003 and will serve as the basis for the meeting discussion. It is available at: http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/LETTERS/clin_2003q4.pdf

With regard to security issues, the NRC has issued several orders and threat advisories to enhance security capabilities and improve guard force readiness since the terrorist attacks on September 11, 2001. The agency has also conducted inspections to review the implementation of these requirements and has monitored the action of plant operators in response to changing threat conditions. The NRC will continue security inspections during 2004.

Current performance indicators and inspection findings for Clinton are available on the NRC web site at: http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/CLIN/clin_chart.html
