

June 3, 2004

Ms. Barbara Romanowsky, Administrator
Office of Environmental Assessment
Louisiana Department of Environmental Quality
P.O. Box 4314
Baton Rouge, LA 70821

Dear Ms. Romanowsky:

We have reviewed the proposed regulation amendments to the Louisiana Administrative Code, Title 33, Part XV, *Radiation Protection*, RP036, received by our office on May 4, 2004. Our review and comments are in response to the State's request for Nuclear Regulatory Commission (NRC) evaluation of the changes to Louisiana Administrative Code that incorporated the amendments identified on the State Regulation Status Data Sheet (SRS). These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) regulations in 10 CFR Part 20, 32, and 35 and the requirements of the one amendment identified in the enclosed SRS. We discussed our review of the regulations with Sharon Parker on June 3, 2004.

As a result of our review, we have fifteen comments. Under our current procedure, a finding that a State regulation meets the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final State regulation. Please provide a final amended version of your rules showing the location of any changes made in response to our comments. If there are any comments which Louisiana believes are in error, the State should identify the section of their regulations that meet the designated compatibility category. Please note that we have limited our review to regulations required for compatibility and/or health and safety, but have determined that if these regulations are adopted, incorporating our comments and without significant change, they would meet the compatibility and health and safety categories established in the Office of State and Tribal Programs (STP) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements." (STP-02-075)

We have also identified a number of issues related to training and experience requirements of persons conducting activities under 10 CFR Part 35, "Medical Use of Byproduct Material." We understand that these items will be resolved at a later date when the NRC rulemaking, in 10 CFR Part 35 related to training and experience, is completed and Louisiana revises that part of its regulations containing these requirements. We have included them in a separate chart for your convenience, and no action on these items is required at this time.

The SRS Data Sheet summarizes our knowledge of the status of other Louisiana regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hrsd.ornl.gov/nrc/rulemaking.htm>.

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or Aaron McCraw of my staff at (301) 415-1277 or ATM@NRC.GOV.

Sincerely,

IRA By K.N.Schneider For

Josephine Piccone, Deputy Director
Office of State and Tribal Programs

Enclosures:
As stated

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or Aaron McCraw of my staff at (301) 415-1277 or ATM@NRC.GOV.

Sincerely,

IRA By K.N.Schneider For

Josephine Piccone, Deputy Director
Office of State and Tribal Programs

EDITORIAL SUGGESTIONS

1. In §756.B.4, change the reference to “Subsection A of this Section” to “Subsection B” to correctly reflect the intention of the paragraph.
2. In Paragraphs 4 and 5 of §757.A replace all instances of “teletherapy physicist” with “authorized medical physicist” to reflect trade-accepted language.

**COMMENTS ON PROPOSED LOUISIANA REGULATIONS
AGAINST COMPATIBILITY AND HEALTH AND SAFETY CATEGORIES**

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
1	421	20.1301 (a) and (c)	2002-2	A	<p>Dose limits for individual members of the public.</p> <p>421.B allows access to be granted to members of the public to restricted areas. 10 CFR 20.1301 states that access can only be granted to controlled areas. The words controlled and restricted cannot be used interchangeably. They are defined as two separate areas.</p> <p>The State should change the wording of 421.B to reflect the difference between the controlled area and the restricted area.</p>
2	421	20.1301 (a) and (c)	2002-2	A	<p>Dose limits for individual members of the public.</p> <p>State omits requirements of paragraph (c) of Part 20.1301 for members of the public visiting a person that cannot be released under 35.75 or equivalent Agreement State regulations.</p> <p>The State needs to adopt regulations regarding the dose to individual members of the public received from patients released under Part 35.75 or equivalent regulations to meet compatibility.</p>
3	102	35.2	2002-2	B	<p>Definition: Authorized medical physicist.</p> <p>State omits the requirements of paragraph (1) of the definition of authorized medical physicist in Part 35.2, which defines the training and experience required for an authorized medical physicist.</p> <p>The State needs to add a reference to the required training and experience for an authorized medical physicist to meet compatibility.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
4	102	35.2	2002-2	B	<p>Definition: Authorized nuclear pharmacist.</p> <p>State omits the requirements of paragraph (1) of the definition of authorized nuclear pharmacist in Part 35.2, which defines the training and experience required for an authorized nuclear pharmacist.</p> <p>The State needs to add a reference to the required training and experience for an authorized nuclear pharmacist to meet compatibility.</p>
5	102	35.2	2002-2	B	<p>Definition: Authorized user.</p> <p>State omits the requirements of paragraph (1) of the definition of authorized user in Part 35.2, which defines the training and experience required for an authorized user.</p> <p>The State needs to add a reference to the required training and experience for an authorized user to meet compatibility.</p>
6	102	35.2	2002-2	B	<p>Definition: Radiation Safety Officer.</p> <p>State omits the requirements of paragraph (1) of the definition of radiation safety officer in Part 35.2, which defines the training and experience required for a radiation safety officer.</p> <p>The State needs to add a reference to the required training and experience for a radiation safety officer to meet compatibility.</p>
7	102	35.2	2002-2	B	<p>Definition: Radiation Safety Officer.</p> <p>The State definition does not mention that the Radiation Safety Officer is required to be listed on the license as is found in the definition in Part 35.2.</p> <p>The State should add language to the current definition to reflect that the radiation safety officer must be listed on the license to meet compatibility.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
8	102	35.2	2002-2	B	<p>Definition: Sealed Source.</p> <p>The State definition refers to a sealed source as any container of radioactive material constructed to prevent escape of material. This definition may be confusing or misleading. Part 35.2 uses language that ensures the source is encased to prevent leakage and escape of material.</p> <p>The State should revise their current definition to define that the source should be encased or encapsulated to prevent leakage or escape of material to provide clarity.</p>
9	703	35.6	2002-2	C	<p>Provisions for the protection of human research subjects</p> <p>The State has omitted the requirements of Part 35.6(b)(1) and (2) that require the licensee to obtain approval from an "Institutional Review Board" and the subject's "informed consent" prior to conducting Federally conducted, funded, supported or regulated research activities.</p> <p>The State needs to adopt the requirements of Part 35.6 requiring Institutional Review Board approval and patient informed consent for the research activities listed above.</p>
10	706 707	35.24	2002-2	D - paragraphs (a) (1), (a) (2), (a)(3), (c), (d), (e), (g) and (h) H&S- paragraph (b) and (f)	<p>Authority and responsibilities for the radiation protection program</p> <p>The State's regulations do not require the radiation safety officer to agree in writing to assuming responsibility of the licensee's radiation protection program. The lack of this requirement may cause liability issues in the event of a violation or accident.</p> <p>The State needs to add language to ensure that each licensee requires the radiation safety officer to assume responsibility of the radiation protection program in writing to meet compatibility.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
11	763.O	35.59	2002-2	B	<p>Recentness of training</p> <p>The State requires training and experience to be acquired within five years of application. NRC regulations allow training to be acquired within seven years of application. The State's regulations are more restrictive than those of the NRC. This could potentially have transboundary implications.</p> <p>The State needs to adopt the requirements of Part 35.59 to meet compatibility.</p>
12	736 737 742 743	35.310 35.315 35.410 35.415	2002-2	H&S	<p>Safety instruction/Safety precautions</p> <p>The State requires the radiation safety officer or the authorized user to be contacted in the event of the patient's or human research subject's death or medical emergency. NRC regulations require both the radiation safety officer or his/her designee and the authorized user to be contacted in the event of a death or medical emergency.</p> <p>The State needs to change the language of their equivalent rule to ensure both the radiation safety officer or designee and the authorized user are contacted.</p>
13	755	35.630	2002-2	H&S, except paragraph (c) is D	<p>Dosimetry equipment</p> <p>The State's requirements for intercomparing dosimetry systems to be used for calibrating sealed sources for therapeutic units do not require the licensee to use a comparable unit in reference to beam attenuators or collimators, as applicable, but does require the radionuclide to be the same as the source used at the licensee's facility.</p> <p>The State needs to add additional language regarding the similarities in beam attenuators and collimators between units as found in 10 CFR 35.630(a)(2) to meet compatibility.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
14	757.A 759	35.642	2002-2	H&S, except paragraph (f) is D.	<p>Periodic spot-checks for teletherapy units</p> <p>In Paragraph A.2.a of §757, the State uses the term “constancy” instead of “accuracy.” This may be an editorial error since similar language in other sections is correct; however, the error will cause compatibility issues.</p> <p>In Paragraph A.2.a of §757, the State needs to replace “constancy” with “accuracy” to meet compatibility.</p>
15	757.A 759	35.642	2002-2	H&S, except paragraph (f) is D.	<p>Periodic spot-checks for teletherapy units</p> <p>In Paragraph A.7.d. of §757, the State does not require the intercom system to be inspected during the safety-spot check. This may be an editorial error since similar language in other sections is correct; however, the error will cause compatibility issues.</p> <p>In Paragraph A.7.d. of §757, the State needs to add “intercom system” to the items inspected during the safety-spot check to meet compatibility.</p>

COMMENTS ON PROPOSED LOUISIANA REGULATIONS AGAINST COMPATIBILITY AND HEALTH AND SAFETY CATEGORIES FOR TRAINING REQUIREMENTS FOR MEDICAL LICENSEES

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
1	763	35.50	2002-2	B	<p>Training for Radiation Safety Officer</p> <p>The State has retained part of the previous Part 35 training requirements; however, in its letter transmitting this amendment, the State noted that it will amend training requirements for Radiation Safety Officers upon completion of NRC's current 10 CFR 35 rulemaking regarding training requirements for physician authorized users.</p> <p>The State should revise this requirement when the NRC rulemaking for Part 35 on training is completed.</p>
2	763	35.51	2002-2	B	<p>Training for an Authorized Medical Physicist</p> <p>The State has retained part of the previous Part 35 training requirements; however, in its letter transmitting this amendment, the State noted that it will amend training requirements for an authorized medical physicist on completion of NRC's current 10 CFR 35 rulemaking regarding pertinent training requirements.</p> <p>The State should revise this requirement when the NRC rulemaking for Part 35 on training is completed.</p>
3	763	35.55	2002-2	B	<p>Training for an authorized nuclear pharmacist</p> <p>The State has retained part of the previous Part 35 training requirements; however, in its letter transmitting this amendment, the State noted that it will amend training requirements for an authorized nuclear pharmacist upon completion of NRC's current 10 CFR 35 rulemaking regarding pertinent training requirements.</p> <p>The State should revise this requirement when the NRC rulemaking for Part 35 on training is completed.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
4	763	35.57	2002-2	B	<p>Training for experienced Radiation Safety Officer, teletherapy or medical physicist, authorized user, and nuclear pharmacist</p> <p>The State has retained part of the previous Part 35 training requirements; however, in its letter transmitting this amendment noted that it will amend training requirements for experienced Radiation Safety Officer, teletherapy or medical physicist, authorized user, and nuclear pharmacist upon completion of NRC's current 10 CFR 35 rulemaking regarding pertinent training requirements.</p> <p>The State should revise these requirements when the NRC rulemaking for Part 35 on training is completed.</p>
5	763	35.190	2002-2	B	<p>Training for uptake, dilution and excretion studies</p> <p>The State has retained part of the previous Part 35 training requirements; however, its letter transmitting this amendment noted that it will amend training requirements for uptake, dilution and excretion studies upon completion of NRC's current 10 CFR 35 rulemaking regarding pertinent training requirements.</p> <p>The State should revise these requirements when the NRC rulemaking for Part 35 on training is completed.</p>
6	763	35.290	2002-2	B	<p>Training for imaging and localization studies</p> <p>The State has retained part of the previous Part 35 training requirements; however, its letter transmitting this amendment noted that it will amend training requirements for imaging and localization studies upon completion of NRC's current 10 CFR 35 rulemaking regarding pertinent training requirements.</p> <p>The State should revise these requirements when the NRC rulemaking for Part 35 on training is completed.</p>
7	763	35.390	2002-2	B	<p>Training for use of unsealed byproduct material for which a written directive is required</p> <p>The State has retained part of the previous Part 35 training requirements; however, its letter transmitting this amendment noted that it will amend training requirements for use of unsealed byproduct material for which a written directive is required upon completion of NRC's current 10 CFR 35 rulemaking regarding pertinent training requirements.</p> <p>The State should revise these requirements when the NRC rulemaking for Part 35 on training is completed.</p>
