Items of Interest
Week Ending April 29, 2005

Grand Gulf Early Site Permit - Draft Environmental Impact Statement for Public Comment

On April 21, 2005, NRR issued NUREG -1817, "Draft Environmental Impact Statement for an Early Site Permit (ESP) at the Grand Gulf ESP Site," for public comment. A 75-day public comment period is scheduled to begin on or about April 29, 2005, with the Notice of Availability of the draft EIS published by the U.S. Environmental Protection Agency. The staff has scheduled public meetings on June 28, 2005, to present its analyses and to accept public comments on the draft EIS.

Quad Cities Unit 2 - Public Meeting to Discuss Start Up Test Plan and Steam Dryer Analyses

From April 25-27, 2005, NRC staff from Region III and NRR held a public meeting with the licensee representatives at Exelon's corporate office in Warrenville, Illinois. The purpose of the meeting was to discuss the start-up test plan proposed for the new instrumented steam dryer for Quad Cities Unit 2. Contractors from Argonne National Laboratory and Penn State University provided staff support. The licensee presented the latest developments in acoustic circuit analysis for prediction of flow-induced vibration loads on the steam dryer. The staff also performed a preliminary sampling audit of the structural finite element analysis of the dryer.

Public Meeting: Proposed Rule on the Post-Fire Operator Manual Actions Proposed

On April 27, 2005, NRR staff held a Category 3 public meeting on the subject issue to provide members of the public and industry representatives opportunities to make comments and address the Commission questions posted in the *Federal Register Notice* (70 FR 10901) dated March 7, 2005. The meeting was supported by staff from NRR's Divisions of Systems Safety and Analysis, Regulatory Improvement Programs and Inspection Program Management, as well as Office of Nuclear Regulatory Research staff, and was attended by members from the industry, the Nuclear Energy Institute, Union of Concerned Scientists, and industry consultants. The staff received initial feedback on the three requests for comments related to time margin, fire suppression systems, and rule acceptance criteria applicability to sections III.G.1 and 2 of Appendix R. The staff also engaged the stakeholders on the Commissions' request to get a clear understanding of the likelihood that the proposed rule would achieve its underlying purpose. Throughout the meeting the staff reiterated to stakeholders that it would like to receive written comments with supporting details. Presentations from the industry focused on its perspectives of the proposed rule with respect to regulatory, safety, risk, and cost considerations. The deadline for the public to submit written comments is May 23, 2005.

Office of Nuclear Material Safety and Safeguards (NMSS)

Week Ending April 29, 2005

NRC Meeting with the Advisory Committee on the Medical Uses of Isotopes

On April 20-21, 2005, the Advisory Committee on the Medical Uses of Isotopes (ACMUI) held its spring meeting at the Bethesda North Marriott Conference Center. On April 20, the ACMUI briefed the Commission on its views concerning: (1) the training and experience final rule in 10 CFR Part 35; (2) the draft 2005 recommendations of the International Commission on Radiological Protection; and (3) NRC's report on dose reconstruction methods. The ACMUI also briefed the Commission on its continued efforts to amend the medical event reporting criteria in 10 CFR Part 35. Other topics of interest to the medical community were presented during the meeting, including the physical presence requirement relating to gamma stereotactic radiosurgery in 10 CFR 35.615(f)(3).

Decommissioning Workshop

On April 20-21, 2005, the Division of Waste Management and Environmental Protection conducted a 2-day public workshop on decommissioning, attended by approximately 200 people, consisting of industry representatives, consultants, representatives from other Federal agencies, and State representatives. The first day of the workshop had opening presentations on topics including: (1) finality/Environmental Protection Agency Memorandum of Understanding; (2) incentives; (3) alignment of NRC decommissioning program with States; (4) improved communications; and (5) revised decommissioning guidance. Those presentations were followed by breakout sessions, on topics related to the License Termination Rule analysis, that included: (1) restricted release/institutional controls; (2) realistic scenarios; (3) mixing of contaminated soil; (4) financial assurance; (5) operational changes; and (6) onsite burials. The second day focused on lessons-learned and also included a presentation by Commissioner Merrifield.

Meeting with U.S. Enrichment Corporation (USEC) Related to the American Centrifuge Plant

On April 25, 2005, staff from the Division of Fuel Cycle Safety and Safeguards, Office of the General Counsel, Office of Nuclear Reactor Regulation, Office of Nuclear Security and Incident Response, and ICF Consulting met with USEC representatives. The meeting was held to discuss USEC's responses to the NRC staff's requests for additional information about the American Centrifuge Plant license application, in the areas of criticality safety, decommissioning funding, human factors, and material control and accounting.

Meeting with Packaging Technology on TRUPACT-III

On April 27, 2005, staff from the Spent Fuel Project Office met with representatives from Packaging Technology to discuss submittal of the redesigned TRUPACT-III transportation package, which will be used for transporting transuranic wastes in large boxes to the Waste Isolation Pilot Plant. The TRUPACT-III design was submitted to NRC in March 2004. However, the application was withdrawn in August 2004 because of some structural issues. Packaging Technology is planning to submit a revised application in July 2006.

Fire Dynamics Seminar for Region IV Fire Protection Inspectors

On April 21, 2005, RES staff presented a fire dynamics training seminar for Region IV fire protection inspectors. This training was requested by the Region and was coordinated with the Office of Nuclear Reactor Regulation. The seminar focused on the tools and techniques described in NUREG-1805, "Fire Dynamics Tools Quantitative Fire Hazard Analysis Methods for the U.S. Nuclear Regulatory Commission Fire Protection Inspection Program." The objective of the training was to help regional fire protection inspectors better understand risk-informed, performance-based fire protection requirements.

Letter of Agreement Between the U.S. Nuclear Regulatory Commission and the OECD/NEA Relating to International Common-Cause Failure Data Exchange (ICDE) Project

On April 25, 2005, the NRC's Executive Director for Operations signed the subject Letter of Agreement between NRC and the Organization for Economic Cooperation and Development/Nuclear Energy Agency (OECD/NEA). This Letter of Agreement defines the terms and conditions by which the NRC and OECD/NEA will continue to cooperate in the exchange of international common-cause failure data on the basis of mutual benefit and reasonable equity and reciprocity. Participation in the project gives the NRC access to proprietary foreign data that would not otherwise be available to us. These data augment the NRC's common-cause failure database with foreign experience and enable us to compare our operating experience with that of other countries to glean insights for use in our quantitative risk studies and inspection activities. This Agreement will become effective upon signature and will remain in effect for three years (through March 31, 2008).

Regulations for the Safe Transport of Radioactive Material; Solicitation of Comments on Proposed Changes (Part 71)

On April 27, 2005, a document was published in the Federal Register (70 FR 21684) announcing that the NRC and the Department of Transportation (DOT) are jointly soliciting comments on the International Atomic Energy Agency (IAEA) regulations for the Safe Transport of Radioactive Material. The proposed changes to IAEA's regulations will likely require compatibility rulemakings by both DOT and the NRC. The comment period for this action closes July 1, 2005.

Office of Public Affairs (OPA)
Items of Interest
Week Ending April 29, 2005

The Office of Public Affairs (OPA) received significant media inquiries on the following:

A Troxler gauge missing - and later found - in Chester County, Pennsylvania.

Exelon's announcement that it intends to apply for renewal of its operating license for Three Mile Island, Unit 1.

NRC's decision to put Texas' radiation protection program on "heightened oversight."

NRC's finding that the fire-retardant material "Hemyc" does not perform according to specifications.

Other Public Affairs Items:

A Region I public affairs officer wrote a "for-the-record" submission for the Brattleboro Reformer objecting to an editorial in the paper suggesting that the "R" in NRC stands for "rubber-stamp."

OPA staff assisted at several end-of-cycle public meetings for nuclear plants.
