Office of Nuclear Reactor Regulation (NRR)
Items of Interest
Week Ending December 30, 2005

Issuance of Amendment to Seabrook Station Unit No. 1 Recapturing Zero Power/Low Power Testing Time

On December 22, 2005, the staff issued an amendment extending the expiration date of the Seabrook Station Unit No. 1 (Seabrook) Facility Operating License. The amendment, issued in accordance with Commission guidance contained in Staff Requirements Memorandum SECY-98-296, allows Seabrook to recapture approximately 41 months of startup testing time incurred prior to issuance of its full-power operating license. This amendment was not a request for license renewal under 10 CFR Part 54. The new expiration date for the operating license is March 15, 2030, which is 40 years from issuance of the full-power license.

Order Issued Approving Transfer of License for Duane Arnold Energy Center (DAEC)

On December 23, 2005, the NRC issued the subject order. The order was issued in response to the August 1, 2005, application from Interstate Power and Light Company (IPL), Nuclear Management Company, LLC (NMC), and FPL Energy Duane Arnold, LLC (FPLE Duane Arnold) which requested approval for the direct license transfer in coordination with IPL's proposed transfer of its 70-percent ownership interest in DAEC to FLPE Duane Arnold. The submittal also requested approval of the transfer of NMC's operating authority to FPLE Duane Arnold. The NRC will issue the conforming amendment for these license transfers on the same date that the transfer of the ownership interest occurs.

Items of Interest
Week Ending December 30, 2005

Issuance of Technical Evaluation Report for Salt Waste Disposal at the Savannah River Site

On December 28, 2005, the Division of Waste Management and Environmental Protection issued a Technical Evaluation Report that documents its analysis and conclusions regarding the U.S. Department of Energy's (DOE's) draft waste determination for salt waste disposal at the Savannah River Site. This draft waste determination was submitted to NRC for review in accordance with the National Defense Authorization Act for Fiscal Year 2005 (NDAA). The NRC staff has concluded that there is reasonable assurance that the applicable criteria of the NDAA can be met provided certain assumptions made in DOE's analysis are verified. The report is publicly available in ADAMS under accession number ML053010225.

Receipt of Petition for Rulemaking (PRM-34-6) from Organization of Agreement States

On December 28, 2005, the NRC published a notice in the Federal Register (70 FR 76724) announcing the receipt of the subject petition for rulemaking. The petitioner requests that the NRC amend its regulations to require that an individual receive at least 40 hours of radiation safety training before using sources of radiation for industrial radiography, clarify the requirements for at least two individuals to be present at a temporary job site, and clarify how many individuals are required to meet surveillance requirements. The comment period for this action closes March 13, 2006.

Contract Award

On December 22, 2005, a competitive cost reimbursement contract no. DR-02-06-005 was awarded to OAO Corporation under the General Services Administration Federal Supply Schedule. The contractor shall develop and deploy the National Source Tracking System (NSTS) which shall track the manufacture, possession and transfer of individual nuclear sealed sources by United States nuclear material and import/export licensees throughout their life-cycle. Upon deployment, the contractor shall provide operational support for the SafeSource Infrastructure and maintenance for the NSTS. The total estimated cost is \$15,310,574, including all options. The period of performance is five years, including three one-year option periods.
