

APPENDIX C

SPECIAL AND INFREQUENTLY PERFORMED INSPECTIONS

This appendix lists IPs for inspecting Independent Spent Fuel Storage Installations (ISFSIs) at operating plants. IMC 2690, "Inspection Program for Dry Storage of Spent Reactor Fuel at ISFSIs", lists IPs for inspecting ISFSIs at other than operating plants.

This appendix also lists inspection procedures that are implemented infrequently for special situations. These inspections are to be performed only when authorized by the Regional Administrator after a review and assessment of plant events or conditions, or to fulfill NRC's obligations under domestic interagency memoranda of understanding, or because of participation in international agencies. These inspections are not part of the baseline or supplemental inspection program elements.

IMC 2516, "Policy and Guidance for the License Renewal Inspection Programs," includes IP 71003, "Post-approval Site Inspection for License Renewal." Regions should ensure IP 71003 inspections are conducted when necessary.
