1. IMC 0320	04/04/07	IMC 0320	07/01/08
2. IP 87127	12/31/02	IP 87127	07/01/08
3. TI 2515/154	01/12/07	_____	_____

TRAINING: None

REMARKS: IMC 0320 (Operating Reactor Security Assessment Program) has been revised to incorporate material controls and accounting into the security cornerstone as a key attribute. Two Performance Indicators were eliminated per Commission guidance. Changes were made to align exhibits with changes in other inspection manual chapters (e.g. IMC 0305, "Operating Reactor Assessment Program," and IMC 0612, "Power Reactor Inspection Reports"). Exhibit markings and instructions were updated. In addition, Exhibit 1 and the security cornerstone chart were updated.

IP 87127 (Radiopharmacy Programs) has been revised to incorporate NRC's new definition of byproduct material and regulatory authority over naturally occurring and accelerator produced radioactive material (NARM).

TI 2515/154 (Material Control and Accounting at Nuclear Power Plants and Wet Storage Sites) has been deleted because it is closed. Per SECY-08-005, the inspection requirements formally under TI 2515/154 are being incorporated into the security cornerstone of the Reactor Oversight Program (ROP).

DISTRIBUTION: Standard
