**MD-715 DATABASE (MD-715)**

The MD-715 Database is a password protected programs used to download NRC personnel demographic information from the Federal Personnel Payroll System (FPPS) database and convert it into a form that is used to create an annual report for the Equal Employment Opportunity Commission (EEOC) and internal status reports. These reports provide the information that allows the NRC to support the goals of the NRC's Comprehensive Diversity Management Plan. MD-715 was developed by Lockheed Martin for the NRC.

MD-715 consists of a collection of queries used to select and load specific information into an Access database, which in turn is used to create reports in Excel that provide the detail used to manage and status the NRC's equal employment opportunity program used to prepare reports required under the authority of Executive Order 11478 as implemented in EEOC Management Directive MD-715. The MD-715 database and information are not publically accessible.

## Attachment A -- MD-715 DATABASE

### BACKGROUND:

MD-715 is a tool that facilitates the retrieval of selected information on NRC employees from the payroll and personnel systems, as necessary to sort and display demographics as required for the reports to EEOC. Queries in the system select and download this data into an Access database in several stages as necessary to collect the full set of data. Reports are produced from the Access database and are exported to Excel in a manner that generates the information necessary to manage and provide the reports. Data for the current and one previous year is obtained to allow reports that compare progress towards meeting EEOC and NRC goals. Snapshots of the data are taken after the close of the Fiscal year with the EEOC report is released in early winter. Reports are created and published to the NRC Offices monthly, quarterly and annually to highlight the demographics specifically for each Office.

The completed annual report submitted to the EEOC and the annual and quarterly internal reports are entered into ADAMS or other approved recordkeeping system. The information in the MD-715 database is considered working information.

The Program Authority for MD-715 is Executive Order 11478 and EEOC Management Directive MD-715.

Dates: The MD-715 database system was first used in creating the EEOC report in 2005 from the FY2004 data snapshot.
