

Site Access Training

(H-100)

SCHEDULE

- **Course presentations are 8:30 am to ~4:00 pm.**
- **Breaks will be provided at approximately one hour intervals.**
- **A one hour lunch break will be provided at a convenient stopping point somewhere between approximately 11:30 and 12:00.**
- **In the middle of Day 2, you will perform a dress-out practical evaluation.**
- **A 50 question, multiple choice exam will be given at the end of Day 2. You must achieve at least an 80% and satisfactorily complete the practical to pass the class.**

BASIC RULES

- **Please return from breaks and lunch at the designated times to minimize impact on the learning environment for others.**
- **Please turn off cellular phones, pagers and other electronic devices during class.**
- **Please minimize side conversations during presentations as they are distracting and may negatively affect the learning environment for others.**
- **Computers provided for student use are subject to the standard NRC usage rules.**
- **Please be sure to clean up after yourself.**

Site Access Training (H-100)

- This course is for NRC & contract employees whose work may involve exposure to commercially-licensed nuclear power production/generation facilities.
- Subsequent annual Site Access Refresher Training course (H-101) is required to maintain access to these facilities. In addition, you will be required to attend “site-specific” training prior to entering a licensee’s facility.
- This course does not meet the requirements for use of respirators for entry into “airborne radioactivity areas.”
- Contact your Radiation Safety Officer to receive a dosimeter, as needed, after you’ve passed the course.

QUESTIONS BEFORE WE START?
