Physical Protection of Shipments of Irradiated Reactor Fuel: NUREG; Issuance; 10 CFR Part 73 (RIN 3150-AI64; NRC-2010-0340; NRC-2009-0163)

On May 28, 2013, the NRC published Revision 2 of NUREG-0561, "Physical Protection of Shipments of Irradiated Reactor Fuel," in the *Federal Register* ([78 FR 31821](#)). The revised NUREG sets forth means, methods, and procedures that the NRC staff considers acceptable for satisfying the requirements for the physical protection of spent nuclear fuel (SNF) during transportation by road, rail, and water; and for satisfying the requirements for background investigations of individuals granted unescorted access to SNF during transportation. The NUREG is related to a final rule published in the *Federal Register* on May 20, 2013 ([78 FR 29519](#)).

List of Approved Spent Fuel Storage Casks: MAGNASTOR[®] System; Direct Final Rule; Withdrawal; 10 CFR Part 72 (RIN 3150-AJ22; NRC-2012-0308)

On May 29, 2013, the NRC published a document in the *Federal Register* ([78 FR 32077](#)), withdrawing a direct final rule ([78 FR 16601](#)) that would have revised its spent fuel storage regulations to include Amendment No. 3 to Certificate of Compliance No. 1031, NAC International, Inc. Modular Advanced Generation Nuclear All-purpose Storage (MAGNASTOR[®]) System listing within the "List of Approved Spent Fuel Storage Casks." The NRC is taking this action because it has received a significant adverse comment from the vendor of MAGNASTOR[®] in response to a companion proposed rule ([78 FR 16619](#)) which was concurrently published with the direct final rule. The withdrawal of this direct final rule was effective May 29, 2013.

Distribution of Source Material to Exempt Persons and to General Licensees and Revision of General License and Exemptions: Final Rule; 10 CFR Parts 30, 40, 70, 170, and 171 (RIN 3150-AH15; NRC-2009-0084)

On May 29, 2013, the NRC published a final rule in the *Federal Register* ([78 FR 32310](#)) amending its regulations to require that the initial distribution of source material to exempt persons or to general licensees be explicitly authorized by a specific license, which includes new reporting requirements. The rule is intended to provide the NRC with timely information on the types and quantities of source material distributed for use either under exemption or by general licensees. In addition, the rule modifies the existing possession and use requirements of the general license for small quantities of source material to better align the requirements with current health and safety standards. Finally, the rule revises, clarifies, or deletes certain source material exemptions from licensing to make the exemptions more risk informed. The rule affects manufacturers and distributors of certain products and materials containing source material and certain persons using source material under general license and under exemptions from licensing. The rule will become effective on August 27, 2013.

Public Meeting to Discuss Limerick Generating Station Draft SEIS

On May 23, 2013, the staff held two identical public meetings in Pottstown, PA, to discuss the preliminary findings of, and receive public comments on, the draft supplemental environmental impact statement (SEIS) on the proposed renewal of the operating licenses for Limerick Generating Station, Units 1 and 2. The preliminary finding of this report is that the adverse environmental impacts of license renewal for Limerick are not great enough to deny the option of license renewal for energy-planning decision-makers. Approximately 40 people attended each meeting. The public comment period will close on June 27, 2013. The staff plans to issue the final SEIS in November 2013.

ENCLOSURE D

Office of Public Affairs (OPA)
Items of Interest
Week Ending May 31, 2013

OPA received significant media inquiries on the following:

- Annual assessment meeting for Turkey Point plant (FL)
- Beaver Valley plant (PA) shut down
- Harris power plant (NC) special inspection
- Sen. Barbara Boxer's call for the Department of Justice to examine Southern California Edison (CA)

Other Public Affairs Items:

OPA supported the following activities:

- Two interviews that provided additional background information regarding Indian Point plant's (NY) license renewal review
- Facilitated an interview with experts from Federal and State Materials and Environmental Management Programs and Nuclear Security and Incident Response and a journalist about security of radioactive sources
