

September 17, 2013

Terry L. O'Clair, Director
Division of Air Quality
North Dakota Department of Health
918 E. Divide Avenue
Bismarck, ND 58501-1947

Dear Mr. O'Clair:

We have reviewed the proposed changes to the North Dakota Radiological Health Rule 33-10-04.2, received by our office on July 10, 2013, and August 16, 2013. These regulations were reviewed by comparison to the equivalent U.S. Nuclear Regulatory Commission (NRC) rules in 10 CFR Part 20 not associated with a specific amendment. We discussed our review of the regulations with Dale Patrick on September 16, 2013.

As a result of our review, we have one comment that has been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. We have limited our review to regulations required for compatibility and/or health and safety and the identification of program elements that create conflicts, duplications or gaps in the orderly pattern of regulations on a nationwide basis (see the 1997 Policy Statement on Adequacy and Compatibility of Agreement State Programs). We have determined that if these regulations are revised, incorporating our comment and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when you revise your regulations to address our comments, a copy of the "as published" regulations be provided to us for review. As requested in FSME Procedure SA-201, "Review of State Regulatory Requirements," please highlight the location of any changes made by North Dakota, in response to our comments, and provide a copy to Division of Materials Safety and State Agreements, FSME.

The State Regulation Status (SRS) Data Sheet summarizes our knowledge of the status of other North Dakota regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the FSME website: <http://nrc-stp.ornl.gov/rulemaking.html>.

T. O'Clair

-2-

If you have any questions regarding the review, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact Kathleen Schneider, State Regulation Review Coordinator, at (301) 415-2320 (kathleen.schneider@nrc.gov) or Dr. Janine Katanic at (817) 200-1151 (janine.katanic@nrc.gov).

Sincerely,

/RA D. White for/

Pamela J. Henderson, Deputy Director
Division of Materials Safety and State Agreements
Office of Federal and State Materials
and Environmental Management Programs

COMPATIBILITY COMMENTS ON NORTH DAKOTA PROPOSED REGULATIONS

STATE SECTION	NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
1	33-10-04.2-07 and Table 4.2-07.1	20.1402 Part 20 Subpart E	N/A	<p>Radiological criteria for unrestricted use</p> <p>NRC recommends that Section 2. Equipment, be deleted with respect to radioactive material. As written, it may be interpreted as allowing each piece of equipment to meet a standard of 25 mRem per year TEDE to an average member of the critical group with respect to all radioactive material. Per NUREG-1757, Consolidated Decommissioning Guidance, Volume 2, 10 CFR Part 20 Subpart E does not apply to equipment, so equipment should not be left on the site at license termination. Equipment should be released under the current approaches for releases of solid materials, as discussed in Section 15.11 of Volume 1 of NUREG-1757, or could be disposed as radioactive waste.</p> <p>Table 4.2-07.1 should be revised as follows to clarify that the Table is limited to NORM and TENORM licenses which are outside of NRC's jurisdiction:</p> <ol style="list-style-type: none"> 1. Revise the title to "Standards for Unrestricted Release for NORM and TENORM" 2. Remove the limits for H-3, which is radioactive material. Note: Although H-3 is cosmogenically produced, it is normally not found in sufficient quantities to constitute a NORM/TENORM hazard. 3. Delete (c)(1) since this reference still includes Atomic Energy Act material. 4. Delete the term "source"

STATE SECTION	NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
				<p>material” in (c)(2) and (c)(3) since source material is Atomic Energy Act material, Note under (c), only limits for radium are given.</p> <p>North Dakota needs to make the above changes in order to meet the Compatibility Category C designation assigned to 10 CFR 20.1402, Radiological criteria for unrestricted use.</p>
