

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

December 16, 2014

Richard Ratliff, Director
Radiation Program
Texas Department of State Health Services
P.O. Box 149347, MC 1987
Austin, TX 78714-9347

Dear Mr. Ratliff:

We have reviewed the proposed regulations, proposed revisions to final regulations and other provisions not associated with a specific RATS ID, to the Texas Department of State Health Services (DSHS) regulations, Texas Regulations for Control of Radiation, 25 Texas Administrative Code (TAC), received by our office on September 15, 2014. These regulations were reviewed by comparison to the equivalent U.S. Nuclear Regulatory Commission (NRC) rules and the requirements of the eleven amendments identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with you on December 16, 2014.

As a result of our review, we have three comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Texas proposed regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Texas regulations. However, we have determined that if your proposed regulations were adopted, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Nuclear Material Safety and Safeguards (NMSS) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

Additionally, in your letter you requested that NRC revise the State Regulation Status sheet to reflect that certain amendments are not the responsibility of DSHS but rather are the responsibility of the Texas Commission on Environmental Quality (TCEQ). Although TCEQ does have authority for portions of 10 CFR Part 40 as it relates to uranium mill authority, there are other portions of 10 CFR Part 40 that relate to source material that are under the authority of DSHS and require adoption by DSHS. Accordingly, the State Regulation Status sheet has not been revised.

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in NMSS (formerly the Office of Federal and State Materials and Environmental Management Programs) Procedure SA-201, "Review of State Regulatory Requirements," please highlight the final changes, and provide a copy to Division of Material Safety, State, Tribal and Rulemaking Programs, NMSS.

R. Ratliff
