TRAINING: No

REMARKS: IMC 1245, "Qualification Program for New and Operating Reactor Programs," has been revised to incorporate the qualification of construction inspectors (IMC 1252), update inspector classifications and IMC format, clarify that an examiner must complete an oral board when completing inspector qualification, and specify the recording of completed qualifications in iLearn.

IMC 1245 Appendix A, "Basic-Level Training and Qualification Journal," has been revised to incorporate the qualification of construction inspectors (IMC 1252), clarifies required training courses, and replaces Task 1 with on-line training in ISA-21. The revision also updates the IMC format, references (including deleting IMC 0300 from ISA-9 and IMC 0320 from ISA-26), and safety culture training to conform to the safety culture common language initiative.

IMC 1245 Appendix B, "General Proficiency-Level Training and Qualification Journal," has been revised to incorporate the qualification of construction inspectors (IMC 1252), and update references, required courses, IMC format and safety culture training.

IMC 1245 Appendix C1, "Reactor Operations Inspector Technical Proficiency Training and Qualification Journal," has been revised to update format and references, and remove writing guidance in ISA-7 (SDP), including two scenarios that are out of date. This revision also closes a feedback form by adding training (on 10 CFR 50.72, 50.73 and NUREG-1022) to the initial (R-624 series) and refresher (R-704 series) simulator courses.

IMC 1248 Appendix G, "Training Requirements and Qualification Journal for Decommissioning Project Managers and Technical Reviewers," has been revised to capture decommissioning project management and technical reviewer activities.
