On April 13, 2017, the NRC published a document in the *Federal Register* ([82 FR 17768](#)) requesting comment on a draft regulatory basis to support a rulemaking that would develop new EP requirements for SMR and other new technologies (ONT), such as non-light-water reactors and medical isotope production facilities. The new EP regulations would be consequence-oriented, performance-based, and technology inclusive to the extent possible, and would continue to provide reasonable assurance of adequate protection of public health and safety. The new EP regulations would be applicable to SMR and ONT facilities only. Large light-water reactors, fuel cycle facilities, research and test reactors and other non-power, non-commercial facilities are not in the scope of this rulemaking. The NRC plans to hold a public meeting to promote full understanding of the rulemaking and to facilitate public participation. Comments are due by June 27, 2017.
