Decision Issued on a Differing Professional Opinion

On October 5, 2017, the Regional Administrator (RA), Region III (R-III), issued a decision on a Differing Professional Opinion (DPO) concerning recordkeeping issues in R-III. The DPO raised concerns regarding the R-III Division of Nuclear Material Safety's (DNMS) decision not to eliminate the addition of paper copies of documents from the DNMS File Room as a potential efficiency enhancement (all documents are also added to the Agency-wide Document Management System (ADAMS)).

On September 15, 2017, an Ad Hoc DPO Panel (Panel) provided the R-III RA with the results of its independent review of the DPO submittal. The Panel concluded that the issue raised to proceed with a digital-only approach, eliminating the addition of paper copies of the documents into the DNMS File Room, was valid. The Panel also concluded that the R-III planned phased approach for the elimination of paper records was reasonable. The Panel recommends that: (1) R-III continue with the pilot program to eliminate redundant paper records and develop lessons learned, and (2) initiate a change to standardize ADAMS profiling templates for licensing documents to enhance document access retrieval.

The RA agreed with the Panel's conclusions. The DPO case file can be found at ML17297B585.
