Office of Nuclear Material Safety and Safety and Safeguards (NMSS)
Items of Interest
Week Ending January 26, 2018

List of Approved Spent Fuel Storage Casks: TN Americas, LLC; Standardized NUHOMS® Horizontal Modular Storage System; Certificate of Compliance No. 1004; Renewal of Initial Certificate and Amendment Nos. 1 Through 11 and 13, and Revision 1, and 14; Corrections; Correcting Amendment; Part 72 of Title 10 of the Code of Federal Regulations (10 CFR) (Regulation Identifier Number (RIN) 3150-AK05; NRC-2017-0138)

On January 24, 2018, the NRC published a document in the *Federal Register (FR)* ([83 FR 3261](#)) correcting a direct final rule that was published in the FR on September 27, 2017 ([82 FR 44879](#)), which amended its spent fuel storage regulations by revising the Standardized NUHOMS® Horizontal Modular Storage System (NUHOMS® System) listing within the “List of approved spent fuel storage casks” to renew, for an additional 40-year period, the initial certificate and Amendment Nos. 1 through 11 and 13, Revision 1, and Amendment No. 14 of Certificate of Compliance No. 1004. The direct final rule was effective December 11, 2017. The purpose of this action is to correct a minor editorial and non-substantive error to Figure 1-15 for both Renewed Amendments Nos. 11 and 13, Revision 1. The correction was effective January 24, 2018.

Revision of Fee Schedules; Fee Recovery for Fiscal Year 2018; Proposed Rule; 10 CFR Parts 170 and 171 [RIN 3150-AJ95; NRC-2017-0026]

On January 25, 2018, the NRC published a document in the FR ([83 FR 3407](#)) proposing to amend the licensing, inspection, special project, and annual fees charged to its applicants and licensees. These proposed amendments are necessary to implement the Omnibus Budget Reconciliation Act of 1990, as amended, which requires the NRC to recover approximately 90 percent of its annual budget through fees; amounts appropriated for Waste Incidental to Reprocessing, generic homeland security activities, and Inspector General services for the Defense Nuclear Facilities Safety Board, as well as any amounts appropriated from the Nuclear Waste Fund, are excluded from this fee-recovery requirement. The NRC is issuing the fiscal year (FY) 2018 proposed fee rule based on the FY 2018 budget request, since full-year appropriations have not yet been enacted for FY 2018. The NRC is proposing to collect \$826.7 million in fees in FY 2018. If the NRC receives an appropriation providing a different total budget authority, the final fee rule will reflect the final appropriation. Comments are requested by February 26, 2018.

Commission Hearing on Construction Permit Application from Northwest Medical Isotopes

On January 23, 2018, the staff participated in a Commission hearing to provide testimony and exhibits regarding the application for a construction permit from Northwest Medical Isotopes (NWMI), LLC, for a medical radioisotope production facility that is proposed to be located in Columbia, Missouri. The staff's testimony focused on unique features of the proposed facility and novel issues that arose as part of its safety and environmental review process. The staff is ready to respond to any post-hearing questions, if issued by the Commission. The Commission expects to make a timely decision on NWMI's construction permit.
