

UNITED STATES  
**NUCLEAR REGULATORY COMMISSION**  
WASHINGTON, D.C. 20555-0001

January 18, 2019

Judith A. Schuerman, Ph.D., Manager  
Radiation Section  
Emergency and Radiological Services Division  
Louisiana Department of Environmental Quality  
P.O. Box 4312  
Baton Rouge, LA 70821-4312

Dear Dr. Schuerman:

We have reviewed the proposed revisions to the Louisiana Department of Environmental Quality rules (equivalent to 10 CFR Part 34) in the Louisiana Administrative Code, Title 33, Part XV, Radiation Protection, received by our office on November 16, 2018. These regulations were reviewed by comparison to the equivalent U.S. Nuclear Regulatory Commission (NRC) rules as identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with you on January 16, 2019.

As a result of our review, we have six comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Louisiana regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Louisiana regulations. However, we have determined that if your proposed regulations were adopted, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Nuclear Material Safety and Safeguards (NMSS) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in NMSS Procedure SA-201, "Review of State Regulatory Requirements," please highlight the final changes, and provide a copy to Division of Materials Safety, Security, State, and Tribal Programs, NMSS.

The SRS Data Sheet summarizes our knowledge of the status of other Louisiana regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the NMSS State Communication Portal: <https://scp.nrc.gov/rulemaking.html>.

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact Michelle Beardsley, State Regulation Review Coordinator, at 301-415-0275 ([michelle.beardsley@nrc.gov](mailto:michelle.beardsley@nrc.gov)) or Stephen Poy at 301-415-7135 ([stephen.poy@nrc.gov](mailto:stephen.poy@nrc.gov)).

Sincerely,

***/RA Paul Michalak for/***

Kevin Williams, Deputy Director  
Division of Materials Safety, Security, State  
and Tribal Programs  
Office of Nuclear Material Safety  
and Safeguards

**COMPATIBILITY COMMENTS ON LOUISIANA PROPOSED REGULATIONS**

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
1	§ 550 A. (1-5)	§ 34.20 <sup>i</sup> (a)(1), (b), (c), (d), & (e)	N/A	B	<p><b>Performance requirements of industrial radiography equipment</b></p> <p>In §550 A. (1), Louisiana states, “each radiographic exposure device and all associated equipment shall meet the requirements specified in American National Standard.” The phrase “source assembly or sealed source” needs to be included such that the phrase reads “each radiographic exposure device, source assembly, or sealed source and all associated equipment shall meet the requirements specified in American National Standard.”</p> <p>Louisiana needs to make the change indicated above to meet the Compatibility Category B designation assigned to 10 CFR 34.20(a)(1).</p>
2	§ 547 A, B, and F	§ 34.31	N/A	C	<p><b>Inspection and maintenance of radiographic exposure devices, transport and storage containers, associated equipment, source changers and survey instruments</b></p> <p>a) Louisiana’s regulations in §547 A.1. state the following:</p> <p>“The licensee or registrant shall perform visual and operability checks on radiation machines, radiographic exposure devices, transport and storage containers, source changers, and associated equipment prior to each day’s use, or work shift, to ensure that:</p> <ol style="list-style-type: none"> <li>1. the equipment is in good condition;”</li> </ol> <p>Louisiana needs to replace the phrase “the equipment is in good condition” in § 547 A.(1) with the phrase, “the equipment is in good working</p>

STATE SECTION	NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
				<p>condition.”</p> <p>b) Louisiana’s regulations in §547 B. state the following:</p> <p>“Each licensee or registrant shall have written procedures for and perform inspections at intervals not to exceed three months, or before first use thereafter, and routine maintenance of radiation machines, radiographic exposure devices, source changers, storage containers, and associated equipment to ensure proper functioning of components important to safety.”</p> <p>Louisiana needs to replace the phrase “source changers, storage containers, and associated equipment” in §547 B. with the phrase, “source changers, transport and storage containers, and associated equipment.”</p> <p>Louisiana needs to make the changes indicated above to meet the Compatibility Category C designation assigned to 10 CFR 34.31.</p>

3	§ 542	§ 34.35	N/A	B	<p><b>Labeling, storage, and transportation</b></p> <p>In § 542 B. Louisiana omits the phrase:</p> <p>“and the wording</p> <p>CAUTION* RADIOACTIVE MATERIAL NOTIFY CIVIL AUTHORITIES (or "NAME OF COMPANY") * _____ or "DANGER".”</p> <p>§ 542 B. needs to include the above phrase to state the following:</p> <p>“The licensee may not use a source changer or a container to store licensed material unless the source changer or the storage container has securely attached to it a durable, legible, and clearly visible label bearing the standard trefoil radiation caution symbol conventional colors, i.e., magenta, purple or black on a yellow background, having a minimum diameter of 25 mm, and the wording</p> <p>CAUTION* RADIOACTIVE MATERIAL NOTIFY CIVIL AUTHORITIES (or "NAME OF COMPANY") * _____ or "DANGER"”</p> <p>Louisiana needs to make the change indicated above to meet the Compatibility Category B designation assigned to 10 CFR 34.35.</p>
4	§ 575	§34.43 <sup>ii</sup> (a)	N/A	B	<p><b>Training</b></p> <p>Louisiana’s regulations in § 575 contain provisions that are not essentially identical to 10 CFR 34.43, and could result in conflicts and transboundary implications, as follows:</p>

				<ul style="list-style-type: none"> <li>• § 575 A.1. and 2. contain provisions requiring that:             <ol style="list-style-type: none"> <li>1. “The individual shall be instructed by a licensed instructor for at least 40 hours in the subjects outlined in LAC 33:XV.599.Appendix A...”; and, “The course of instruction shall be approved by the department prior to the time of instruction by submitting documentation of instructor licensure and course description.                 <ol style="list-style-type: none"> <li>a. The department must be notified by the licensee at least two weeks prior to presentation of the course.</li> <li>b. The department must be notified of the cancellation of the course at least 24 hours prior to its scheduled time of presentation.”</li> </ol> </li> </ol> <p>These Louisiana provisions differ from 10 CFR 34.43(a)(1), which does not include the “at least 40 hours” provision and does not require approval or notification regarding the course of instruction. Louisiana’s regulations are more restrictive and could have transboundary implications.</p> <ol style="list-style-type: none"> <li>2. “The individual shall complete a minimum of two months of on-the-job training supervised by one or more radiographer instructors.                 <ol style="list-style-type: none"> <li>a. The instructor shall be issued a radiographer certification card with instructor status by the department.</li> <li>b. The on-the-job training shall include at least:                     <ol style="list-style-type: none"> <li>i. 200 hours of active participation in radioactive materials industrial radiography operations for an individual to perform industrial radiography utilizing radioactive materials; and/or</li> </ol> </li> </ol> </li> </ol> </li> </ul>
--	--	--	--	---

ii. 120 hours of active participation in X-ray industrial radiography operations for an individual to perform industrial radiography utilizing X-rays.  
c. The hours of on-the-job training do not include safety meetings or classroom training or the use of a cabinet X-ray unit.”

These Louisiana provisions differ from 10 CFR 34.43(a) and (b), which do not establish requirements for radiographer instructor certification cards, and which do not specify certain hours and types of on-the-job training. Louisiana’s regulations are more restrictive and could have transboundary implications.

- § 575 B. 2. contains provisions requiring
  - a. (§ 575 B.2.(a)) that the instructor shall be issued a radiographer certification card with instructor status by the department;
  - b. (§ 575.B.8) that each radiographer trainee I.D. card does not expire, unless revoked or suspended in accordance with LAC 33:XV.579.

10 CFR 34.43 does not contain the above provisions which makes the Louisiana regulations more restrictive. Since 10 CFR 34.43(a) is designated as a Compatibility Category B, Louisiana’s regulations needs to be essentially identical in order to be compatible with 10 CFR 34.43.

Louisiana needs to submit regulations that are essentially identical to 10 CFR 34.43, to meet the Compatibility Category B designation assigned to 10 CFR 34.43.

5	§ 575 C.	§ 34.79	NA	C	<p><b>Records of training and certification</b></p> <p>Louisiana’s regulations in § 575 C. require that records be maintained until disposition is authorized by the department. 10 CFR 34.79 requires that records be maintained for 3 years. This could result in the Louisiana regulations being more or less restrictive, i.e., if the department authorizes the maintenance of records for more or less than 3 years.</p> <p>Louisiana needs to revise § 575 C. as indicated above to meet the Compatibility Category C designation assigned to 10 CFR 34.79.</p>
6	§ 579 § 588 A. (7) § 590 E. (3)	NA	NA	NA	<p><b>[None]</b></p> <p>Louisiana’s regulations in § 579 § 588 A.(7), and § 590 E.(3) contain provisions that require certification cards for radiographers and radiographer trainees in lieu of being named as authorized users on the license.</p> <p>10 CFR 34.43(a) and (b) contain the training and experience requirements that the licensee needs to follow in authorizing individuals to operate as radiographers under their license. In addition, 10 CFR 34 Appendix B contains the requirements to be a “certifying entity”. Louisiana’s regulations do not allow the licensee to authorize individuals as radiographers under their license; and they give the State the authority to be the “certifying entity”, therefore making the Louisiana regulations more restrictive which could have transboundary implications.</p> <p>Louisiana needs to remove these requirements in order to be compatible with 10 CFR 34.43.</p>

<sup>i</sup> See CR-02-01 for additional information

ii If a State wishes to clearly specify the number of hours of formal classroom training as specified in the SSR§s, this would be considered compatible. Also in 34.43 (b)(1) and (c)(1) references to 10 CFR 30.7 and 30.9 are not required for adoption by an Agreement State because these sections are assigned Compatibility Category D.
