List of Approved Spent Fuel Storage Casks: NAC International MAGNASTOR® Cask System, Certificate of Compliance No. 1031, Amendment No. 7; Correcting Amendment; Part 72 of Title 10 of the Code of Federal Regulations (10 CFR) [Regulatory Identifier Number (RIN) 3150-AJ89; NRC-2017-0008]

On March 20, 2019, the NRC published a document in the *Federal Register* (84 FR 10257) correcting a direct final rule published on June 6, 2017 (82 FR 25931), which was effective on August 21, 2017. The technical specifications for NAC International MAGNASTOR® Cask System, Amendment No. 7 included a minor editorial and non-substantive error. The purpose of this action was to correct the error. This rule was effective on March 20, 2019.

Enhanced Security of Special Nuclear Material: Revised Regulatory Basis; Extension of Comment Period; 10 CFR Part 73 (RIN 3150-AJ41; NRC-2014-0118)

On March 20, 2019, the NRC published a document in the *Federal Register* (84 FR 10269) extending the public comment period for a draft revised regulatory basis published on March 1, 2019 (84 FR 6980), to allow members of the public more time to develop and submit their comments. The public comment period, originally scheduled to close on April 1, 2019, is extended. Comments should be filed no later than April 19, 2019.

Commission Correspondence

1. Letter to the Honorable Mike Braun, et al., submits the NRC's Fiscal Year 2020 Congressional Budget Justification, dated March 18, 2019.
2. Letter to the Honorable John Barrasso, et al., submits the 26th monthly status report on the licensing activities and regulatory duties of the NRC (for the reporting period through January 2019), dated March 11, 2019.
3. Letter to the Honorable Salud O. Carbajal, responds to letter requesting that the NRC hold a public meeting near the Diablo Canyon Nuclear Power Plant to help inform the NRC's work on identifying best practices for establishment and operation of local decommissioning community advisory boards pursuant to the Nuclear Energy Innovation and Modernization Act (NEIMA), dated March 15, 2019.

Federal Register Notices Issued

1. ACRS Meeting of the 663rd Meeting of the ACRS Full Committee on Reactor Safeguards – Notice of Meeting – May 2-4, 2019.

DPO Decision

On February 28, 2019, the Regional Administrator (RA) for the U.S. Nuclear Regulatory Commission's (NRC's) Region IV office issued a formal decision on a Differing Professional Opinion (DPO) submitted on October 31, 2017, involving the results of a Problem Identification and Resolution (PI&R) inspection conducted at the Cooper Nuclear Station (CNS). Specifically, the DPO stated that five NRC Region IV staff findings and/or violations documented in the CNS PI&R inspection report 05000298/2017010 were either not violations of NRC requirements, were inconsequential and thus should not have been documented, or were otherwise not adequately supported by the information provided in the report. On April 13, 2018, an Ad Hoc Panel (Panel) provided the results of its independent review of the DPO to the former Region IV RA, who had not decided the matter prior to his retirement from the NRC in December 2018. The succeeding RA conducted a thorough review of all the information gathered regarding this DPO and subsequently agreed with the Panel's conclusions, issued a formal directive to his staff that the CNS PI&R inspection report be modified and reissued, and provided several Reactor Oversight Process related recommendations to the program office director at NRC headquarters. The DPO case file can be found at Agency-wide Documents Access and Management System (ADAMS) Accession No. ML19078A362.

DPO 2018-003 - Power Reactor Licensee Changes to Security Plans Submitted under Title 10 of the Code Of Federal Regulations 50.54(P)(2)

DPO Decision

On February 1, 2019, the Director, Office of Nuclear Security and Incident Response (NSIR) issued a decision on a Differing Professional Opinion (DPO) submitted on May 3, 2018, regarding the U.S. Nuclear Regulatory Commission's (NRC) implementation of the regulatory framework governing power reactor licensee changes to security plans submitted under Title 10 of the Code of Federal Regulations (10 CFR) 50.54(p)(2). Specifically, the DPO raised concerns that there is a lack of a clear and understandable regulatory framework governing the Commission's meaning and intent for security plan changes submitted under the provisions of 10 CFR 50.54(p)(2) relative to Commission-approved security plans, security plan content/description requirements, baseline inspection activities, and records collection requirements. On November 15, 2018, an Ad Hoc Panel (Panel) provided the results of its independent review of the DPO to the Director of NSIR. The Director of NSIR agreed in principle with the Panel's conclusions and recommendations, and provided clarifications as well as additional recommendations. The DPO case file can be found at Agency-wide Documents Access and Management System (ADAMS) Accession No. ML19085A043.
