COMMISSION VOTING RECORD

DECISION ITEM: SECY-19-0031

TITLE: EXELON GENERATION COMPANY, LLC, REQUEST FOR
EMERGENCY OPERATIONS FACILITY CONSOLIDATION

The Commission acted on the subject paper as recorded in the Staff Requirements Memorandum (SRM) of April 17, 2019.

This Record contains a summary of voting on this matter together with the individual vote sheets, views and comments of the Commission.

A handwritten signature in black ink, appearing to read "Annette L. Vietti-Cook", written over a horizontal line.

SUBJECT: SECY-19-0031: Exelon Generation Company, LLC,
Request for Emergency Operations Facility
Consolidation

Approved XX Disapproved ___ Abstain ___ Not Participating ___

Comments: Below XX Attached ___ None ___

The staff has evaluated the requisite factors and concluded that the proposed relocation of the Calvert Cliffs Nuclear Power Plant emergency operations facility (EOF) and the consolidation with the existing Coatesville EOF would continue to fulfill the necessary emergency response functions and would meet applicable regulations as set forth in 10 CFR 50.47 and Appendix E of 10 CFR Part 50 and the criteria contained in the applicable guidance. In light of this, I approve the proposed action.

The NRC staff recommends approval of Exelon's request to consolidate the emergency operations facility (EOF) for the Calvert Cliffs plant into Exelon's existing EOF in Coatesville, Pennsylvania, which currently serves as the EOF for three other nuclear power plants operated by Exelon (Limerick, Peach Bottom, and Three Mile Island). In its analysis of Exelon's request, the staff examined several factors, including the technical and communications capabilities of the facility, its capacity to address a multi-site event, and the experience and training of the personnel available at Exelon's nuclear corporate offices in Kennett Square to staff the EOF. The staff also considered Exelon's commitment to conduct a drill involving simultaneous events at two sites served by the consolidated EOF to demonstrate that there would be no reduction in emergency preparedness capabilities from the proposed consolidation. Based on its analysis, the NRC staff concluded that the proposed relocation "would not impact the ability of the facility to continue to effectively support Exelon's emergency response at all of the sites that the facility serves" and that "protective measures can and will be implemented in the event of a radiological emergency at any of the sites that the Coatesville EOF will serve." In addition, the Maryland state and local agencies with emergency response roles have indicated their concurrence with the proposed consolidation. The Federal Emergency Management Agency also found that the proposed consolidation would not negatively impact offsite emergency plans and procedures. For these reasons, I approve Exelon's request to consolidate the Calvert Cliffs EOF into Exelon's existing Coatesville EOF.

I approve the proposed relocation of the Calvert Cliffs Nuclear Power Plant (CCNPP) emergency operations facility (EOF) and consolidation into the existing Coatesville EOF. My approval is based on the staff's evaluation, which concluded that the proposed relocation of the CCNPP EOF, and consolidation with the existing Coatesville EOF, would fulfill necessary emergency response functions and meet applicable regulations. In addition, the staff found that the relocation of the CCNPP EOF to the existing Coatesville EOF would not impact the ability of the facility to continue to effectively support Exelon's emergency response at all of the sites that the facility serves.

Comments: Below X Attached None

I appreciate the staff's thorough analysis of Exelon's request to relocate and consolidate the emergency operations facility (EOF) for Calvert Cliffs Nuclear Power Plant with the existing EOF located in Coatesville, Pennsylvania. The Coatesville EOF is currently used by Limerick Generating Station, Peach Bottom Atomic Power Station, and Three Mile Island Nuclear Station.

The staff concluded that if the proposed consolidation was approved, the NRC would continue to have reasonable assurance that protective measures can and will be implemented in the event of a radiological emergency at any of the sites that the Coatesville EOF will serve. The affected state and local entities have concurred on Exelon's request and the Coatesville EOF has demonstrated acceptable performance during previous drills and exercises. Therefore, I approve Exelon's request.
