Dear Sir or Madam:

In accordance with the registration requirements given in 10 CFR § 72.212(b)(2), Southern California Edison (SCE) hereby submits registration information for the final canister used for the storage of spent fuel at the Independent Spent Fuel Storage Installation of the San Onofre Nuclear Generating Station (SONGS). The canister registration information is provided in the Enclosure.

Reference 1 provided NRC approval for amendments to the SONGS Units 1, 2, and 3 operating licenses and technical specifications. Upon implementation of these amendments, the operating licenses for these three units will no longer authorize storage of spent nuclear fuel in the spent fuel pools.

Southern California Edison hereby certifies that as of August 7, 2020, all spent nuclear fuel assemblies have been permanently transferred out of the SONGS Units 2 and 3 spent fuel pools and placed in storage within the Independent Spent Fuel Storage Installation (ISFSI).

This certification fulfills implementation requirements for the license changes approved in References 1, 2, 3, and 4 for the Technical Specifications, Emergency Plan, Security Plan, and Quality Assurance Plan, respectively. These changes specify that they be implemented within a specific timeframe following submittal of written certification to the NRC that all spent nuclear fuel assemblies have been transferred out of the spent fuel pools and placed in storage within the ISFSI.

There are no new regulatory commitments in this letter.

For additional information concerning the storage of spent fuel under this general license, please contact Mr. Al Bates at 949-368-6945.

Sincerely,

A handwritten signature in black ink, appearing to be 'S. A. Morris', written in a cursive style.
