ENCLOSURE A

**Office of the Chief Information Officer (OCIO)**  
**Items of Interest**  
**Week Ending April 1, 2022**

Freedom of Information Act and Privacy Act Requests, Appeals, and Consultations Received  
During the Period of March 28 – April 1, as submitted by requester

<b>Tracking Number</b>	<b>Requester's Name</b>	<b>Requester's Organization</b>	<b>Request Description</b>	<b>Received Date</b>
2022-000114	Ethan Polcyn		Information relating to the navigation systems used in the W87-1 warhead created at the Kansas City National Security Campus	03/28/2022
2022-000115	Dustin Slaughter		Freedom of Information Act processing notes for the following cases: NRC-2022-000064, NRC-2022-000065, NRC-2022-000068 and NRC-2022-000069	03/29/2022

APRIL 11, 2022

ENCLOSURE B

**Office of Nuclear Reactor Regulation (NRR)  
Items of Interest  
Week Ending April 1, 2022**

**U.S. Nuclear Regulatory Commission (NRC) Internal Transfer of Project Management for Aerotest Operations Inc. (Aerotest) Radiography and Research Reactor**

On March 27, 2022, NRC staff project management for the Aerotest Radiography and Research Reactor (ARRR) transferred from the NRR to the Office of Nuclear Material Safety and Safeguards. By letter dated March 21, 2022, the NRC staff informed Aerotest, the licensee for the ARRR, of this transfer. This change reflects that the licensing and safety basis for the ARRR are now consistent with a permanently shut down and defueled condition, following the NRC's issuance of a possession-only license amendment to Aerotest on December 6, 2021.

**NRC Issued a Letter to Florida Power and Light for Renewed Licenses**

On March 25, 2022, NRC issued a change letter ([ML22073A122](#)) to Florida Power and Light for Turkey Point, Units 3 and 4, regarding its subsequent renewed operating license expiration dates. Following the Commission's direction in the February 24, 2022, Memorandum and Order (CLI-22-02 ([ML22055A496](#))), the NRC staff modified the expiration dates for Subsequent Renewed Facility Operating License Nos. DPR-31 and DPR-41, for Turkey Point, Units 3 and 4, to reflect the end dates of the previous renewed licenses, July 19, 2032, and April 10, 2033, respectively.

**NRC Issued a Letter to Constellation Energy LLC for Renewed Licenses**

On March 25, 2022, NRC issued a change letter ([ML22073A193](#)) to Constellation Energy Generation, LLC for Peach Bottom, Units 2 and 3, regarding its subsequent renewed operating license expiration dates. Following the Commission's direction in the February 24, 2022, Memorandum and Order (CLI-22-02 ([ML22055A496](#))), the NRC staff modified the expiration dates for Subsequent Renewed Facility Operating License Nos. DPR-44 and DPR-56, for Peach Bottom, Units 2 and 3, to reflect the end dates of the previous renewed licenses, August 8, 2033, and July 2, 2034, respectively.

**NRC Staff hosted a Public Webinar to Discuss Title 10 of the Code of Federal Regulations (10 CFR) Part 53**

On March 29, 2022, the NRC staff hosted a public webinar to share proposals on key topics associated with the 10 CFR, Part 53 preliminary proposed rulemaking package, including previously received public comments. Representatives from the Nuclear Energy Institute, the United States Nuclear Industry Council, and the Breakthrough Institute, as well as other industry and public stakeholders, also provided perspectives on the use of the quantitative health objectives as a performance metric; how beyond design basis events are addressed; requirements to maintain doses to workers and the public consistent with as low as reasonably achievable objectives; and the inclusion of a facility safety program as an operational program. Some stakeholders continued to express concerns about aspects of the preliminary proposed rule language, but in general the staff received positive feedback on the productive dialogue on these key issues.

### **NRC Received Regulatory Engagement Plan from General Atomics – Electromagnetic Systems (GA-EMS)**

By letter dated March 28, 2022, GA-EMS submitted to the NRC a regulatory engagement plan detailing pre-application activities for a 50-megawatt electric, helium-cooled fast modular reactor (FMR). The U.S. Department of Energy (DOE) selected GA-EMS FMR for the Advanced Reactor Concepts-20 (ARC-20) phase of its Advanced Reactor Demonstration Program and GA-EMS is pursuing demonstration of the FMR by 2030 and commercial deployment by the mid-2030s.

### **NRC Staff to Revise Safety Review Schedule for Subsequent License Renewal Application (SLRA) for Oconee Nuclear Station**

On March 31, 2022, staff informed the licensee that due to the large quantity, and complexity, of outstanding technical issues related to the safety review that still remain unresolved for the SLRA for Oconee Nuclear Station, Units 1, 2 and 3 from Duke Energy Carolinas, the staff has determined that a schedule change is needed for issuance of the safety evaluation report and Advisory Committee on Reactor Safeguards Full Committee Meeting (August and October 2022, respectively). The staff will provide the licensee the revised schedule changes once all second-round requests for additional information responses have been received.

### **NRC Staff Received Regulatory Engagement Plan from Advanced Reactor Concepts**

On March 28, 2022, Advanced Reactor Concepts provided the staff with a Regulatory Engagement Plan (Plan) for their 100 MWe ARC-100 sodium-cooled fast reactor design that was selected by the DOE for an award under the Advanced Reactor Demonstration Program's "ARC-20" phase. The Plan includes numerous meetings on the ARC-100 design, specific technical topics and the submittal of six topical reports and three technical papers in 2022 and 2023. The Plan does not commit to a specific licensing pathway or schedule but proposes using the Part 50 process for submitting construction permit and operating license applications.

**Office of Nuclear Material Safety and Safeguards (NMSS)**  
**Items of Interest**  
**Week Ending April 1, 2022**

**Kewaunee License Transfer**

On March 31, 2022, the NRC staff issued an order ([ML22014A387](#)) approving the transfer of the operating license for Kewaunee Power Station from Dominion Nuclear Projects Inc. to EnergySolutions LLC. Dominion and EnergySolutions requested the transfer on May 10, 2021 ([ML21131A141](#)). The transaction would transfer the plant operator, Dominion Energy Kewaunee, to Kewaunee Solutions, Inc.

**Decommissioning Rule Public Meeting**

On March 31, 2022, the staff held a hybrid public meeting on the decommissioning rulemaking proposed rule ([87 FR 12254](#)). There were 32 members of the public in attendance, and they all joined the meeting remotely. Attendees included 8 individuals affiliated with state governments, 7 congressional staffers, 4 individuals affiliated with the nuclear industry, 2 tribal representatives, and 11 others with unknown affiliation. The staff discussed the proposed rule to facilitate submissions of public comments. The staff is planning to hold additional hybrid meetings in April in various locations around the country. The public comment period on the proposed rule ends on May 17, 2022.
