

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

July 15, 2022

Mr. Earl Fordham, Deputy Director
Office of Radiation Protection
Washington Department of Health
111 Israel Road, SE
P.O. Box 47827
Olympia, WA 98504-7827

Dear Mr. Fordham:

We have reviewed the Washington proposed legally binding requirement (license condition) which allows for radioactive material with a half life greater than 120 days to be held for decay in storage (DIS) until survey results are indistinguishable from background, received by our office on June 1, 2022. We discussed our review of the license condition with you on July 14, 2022.

The Standing Committee on Compatibility (Committee) reviewed the Washington proposed license condition. The Committee's review was conducted in accordance with the "Agreement State Program Policy Statement" (82 FR 48535); October 18, 2017 and the categorization process for NRC program elements in NRC Management Directive 5.9 "Adequacy and Compatibility of Program Elements for Agreement State Programs."

The Committee determined the following:

- Washington did not provide a technical analysis for justifying the use of this generic condition.
- Current NRC requirements limits the disposal of waste by DIS to radionuclides with half-lives less than 120 days. NRC has issued exemptions to allow for the disposal of radionuclides with half-lives greater than 120 days by DIS on a licensee by licensee basis with appropriate analysis and justification. Factors to consider include those found in Regulatory Issue Summary 2008-12 *Considerations for Extended Interim Storage of Low-Level Radioactive Waste by Fuel Cycle and Materials Licensees* (ADAMS Accession No. ML073330725)
- An alternative to the use of DIS in 10 CFR 20.2001 is the use of 10 CFR 20.2002. The license condition provided by Washington does not contain all criteria for using an alternative disposal by DIS as stated in 10 CFR 20.2002. Additional guidance for the disposal of very low-level radioactive waste using 20.2002 can be found at <https://www.nrc.gov/waste/llw-disposal/very-llw.html>.

The Committee noted that Washington does not have regulations equivalent to 10 CFR 20.2002, however, Washington may wish to promulgate equivalent provisions in order to approve such exemption requests for alternate disposal procedures on a case by case basis.

It was the consensus of all members of the Committee that Washington's proposed license condition cannot be approved as presented.

Please find enclosed a copy of the Washington State Regulation Status (SRS) Data Sheet which summarizes our knowledge of the status of this and other Washington regulations, as indicated. Please let us know if you note any inaccuracies or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the NMSS State Communication Portal: <https://scp.nrc.gov/rulemaking.html>.

If you have any questions regarding the review results, the compatibility and health and safety categories or any of the NRC regulations used in the review, please contact Michelle Beardsley, State Regulation Review Coordinator, at (301) 415-0275 (Michelle.Beardsley@nrc.gov).

Sincerely,

Signed by Anderson, Brian
on 07/15/22

Brian C. Anderson, Chief
State Agreement and Liaison Programs Branch
Division of Materials Safety, Security, State
and Tribal Programs
Office of Nuclear Material Safety
and Safeguards
