## NRC Announces Headquarters and Regional Leadership Appointments

Scott A. Morris

The Nuclear Regulatory Commission today announced leadership appointments naming Scott A. Morris as Deputy Executive Director for Reactor and Preparedness Programs and Raymond K. Lorson as Region I Administrator.

Both Morris and Lorson will transition to their new roles following the retirements of DEDR Darrell J. Roberts and Region I Administrator David C. Lew at the end of the year.

NRC Executive Director for Operations Daniel H. Dorman, who made the announcement, praised the two as “extremely talented individuals committed to NRC’s complex and important mission.”

“Scott has an impressive and proven record of leadership accomplishments in a broad range of skillsets,” said Dorman. “He brings an in-depth knowledge of nuclear energy programs to his new management role. His experience as an engineer and an administrator will help guide our future work.

“Since joining the NRC, Ray has served admirably, strategically and effectively, implementing complex programs while leading staff with a focus on the values that continue to guide our performance. I am pleased to announce his selection,” Dorman added.

Morris joined the NRC in 1993. His roles included senior resident inspector at two of Region I’s nuclear power sites. He also served as an executive technical assistant for the EDO, and a branch chief in the Office of Nuclear Safety and Incident Response. He has been the Region IV administrator since 2018.

Raymond K. Lorson

Morris is a graduate of the NRC Senior Executive Development Program. He is a Navy submarine program service veteran and holds a bachelor’s degree in Electrical Engineering from Pennsylvania State University.

Lorson joined the NRC in 1991 as a regional reactor engineer. He also served as resident inspector at the Peach Bottom and Salem nuclear power plants, as well as senior resident inspector at the Seabrook and Salem plants. He also served in a variety of other agency leadership roles.

Lorson is a veteran of the U.S. Navy. He holds a bachelor's degree in Chemical Engineering from the University of Pittsburgh and is a graduate of the NRC SESDP.

Morris will be based at the NRC headquarters in Rockville, Maryland, and Lorson will remain at the Region I office in King of Prussia, Pennsylvania.
