# FY 2024 PROPOSED FEE RULE WORK PAPERS

# FY 2024 Proposed Fee Rule Work Papers

The supporting information to the FY 2024 Proposed Fee Rule is contained in the following work papers. The items identified in the Table of Contents are located behind a corresponding Tab. At the beginning of each Tab is a cross reference, if appropriate, to the location of the subject matter and Tables found within the Proposed Fee Rule Document. For example, a reference to **"Section II."** is the supporting information for: **Section II.** FY 202X Fee Collection **A.** Amendments to 10 CFR Part 170 **1.** Professional Hourly Rate.

The complete outline of the FY 2024 Proposed Fee Rule showing the Section and Table titles is located immediately following the Table of Contents.

### **Budget and Fee Recovery**

Section III

### Table I Table II

The NRC is issuing this FY 2024 proposed fee rule based on the FY 2024 budget request as further described in the NRC's FY 2024 Congressional Budget Justification (CBJ) (NUREG–1100, Volume 39) because a full-year appropriation has not yet been enacted for FY 2024. The proposed fee rule reflects a total budget authority in the amount of \$1006.3 million, an increase of \$79.1 million from FY 2023. The FY 2024 budget request proposes the use of \$27.1 million in carryover to offset the Nuclear Reactor Safety budget, resulting in a gross budget authority of \$979.2 million, which is an increase of \$52.1 million from FY 2023. As explained in the proposed fee rule, certain portions of the NRC's total budget authority for the fiscal year are excluded from NEIMA's fee-recovery requirement under Section 102(b)(1)(B) of NEIMA. Based on the FY 2024 CBJ, these exclusions total \$156.0 million, consisting of \$104.2 million for fee-relief activities; \$34.2 million for advanced reactor regulatory infrastructure activities; \$15.1 million for generic homeland security activities; \$1.0 million for waste incidental to reprocessing activities; and \$1.5 million for Inspector General services for the Defense Nuclear Facilities Safety Board.

Based on the 100 percent fee-recovery requirement, the NRC will have to recover approximately \$823.2 million in FY 2024 through 10 CFR Part 170 licensing and inspection fees and 10 CFR Part 171 annual fees. The amount required by law to be recovered through fees for FY 2024 would be \$35.1 million more than the amount estimated for recovery in FY 2023, an increase of 4.4 percent.

The FY 2024 fee recovery amount is increased by \$2.5 million to account for billing adjustments (i.e., for FY 2024 invoices that the NRC estimates will not be paid during the fiscal year, less payments received in FY 2024 for prior year invoices). This leaves approximately \$825.7 million to be billed as fees in FY 2024 through 10 CFR Part 170 licensing and inspection fees and 10 CFR Part 171 annual fees.

The NRC estimates that \$205.5 million would be recovered from 10 CFR Part 170 fees in FY 2024. This represents an increase of \$10.5 million or approximately 5.4 percent as compared to the estimated 10 CFR Part 170 collections of \$195.0 million for FY 2023. The remaining \$620.2 million would be recovered through the 10 CFR Part 171 annual fees in FY 2024, which is an increase of \$24.6 million when compared to estimated 10 CFR Part 171 collections of \$595.6 million for FY 2023.

See Tab "Budget Authority (FY 2024)" for supplemental information on the distribution of budgeted FTE and contract dollars.

#### Budget and Fee Recovery FY 2024 (\$ in Millions) (Individual dollar amounts may not add to totals due to rounding)

	FY 2024
Total Budget Authority	\$979.2
Less Budget Authority for Excluded Activities	-\$156.0
Balance	\$823.2
Fee Recovery Rate for FY 2024	x 100
Total Amount to be Recovered For FY 2024	\$823.2
Estimated Amount to be Recovered through 10 CFR Part 170 Fees	-\$205.5
Estimated Amount to be Recovered through 10 CFR Part 171 Fees	\$617.7
10 CFR Part 171 Billing Adjustments	\$2.5
Adjusted 10 CFR Part 171 Annual Fee Collections Required	\$620.2

### Congressional Budget Justification FY 2024

1	\$	in	Thousands	د:

Uranium Recovery Program & Unregistered General Licensees	\$7,902
Potential Department of Defense remediation program Non-Military Radium Sites	\$783 \$193
Fee Relief Activities @ fully costed rate	\$104,187

Section III.A

# Determination of Professional Hourly Rate

Section III.A.1

### Table III

Final Professional Hourly Rate is \$321

The NRC's professional hourly rate is derived by adding budgeted resources for (1) mission-direct program salaries and benefits; (2) mission indirect-program support; and (3) agency support (corporate support and the Inspector General (IG), then subtracting certain offsetting receipts and then dividing this total by mission direct full-time equivalents (FTE) converted to hours. The only budgeted resources excluded from the professional hourly rate are those for mission-direct contract activities.

The NRC has reviewed and analyzed actual time and labor data in the NRC's Human Capital Management Cloud System for the most recent completed fiscal year (FY 2023) to determine if the annual direct hours worked per direct FTE estimate requires updating for the FY 2024 fee rule. Based on this review using actual time and labor data, the NRC determined that 1,500 hours is the best estimate of direct hours worked annually per direct FTE. This estimate excludes all non-direct activities, such as annual leave, sick leave, holidays, training, and general administration tasks.

### **Definitions of Professional Hourly Rate Components**

#### **Mission-Direct Program Salaries and Benefits:**

These resources are allocated to perform core work activities committed to fulfilling the agency's mission of protecting public health and safety, promoting the common defense and security, and protecting the environment. These resources include the majority of the resources assigned under the direct business lines (Operating Reactors, New Reactors, Fuel Facilities, Nuclear Materials Users, Decommissioning and Low-Level Waste, and Spent fuel Storage and Transportation) are core work activities considered mission-direct.

#### **Mission-Indirect Program Support:**

These resources support the core mission-direct activities. These resources include for example, supervisory and nonsupervisory support, and mission travel and training. Supervisory and nonsupervisory support, and mission travel and training resources assigned under direct business line structure, are considered mission-indirect due to their supporting role of the core mission activities.

### Agency Support (Corporate Support and the IG):

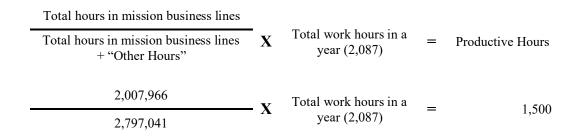

These resources are located in executive, administrative, and other support offices such as the Office of the Commission, the Office of the Secretary, the Office of the Executive Director for Operations, the Offices of Congressional and Public Affairs, the Office of the Inspector General, the Office of Administration, the Office of the Chief Financial Officer, the Office of the Chief Information Officer, the Office of the Chief Human Capital Officer and the Office of Small Business and Civil Rights. These resources administer the corporate or shared efforts that more broadly support the activities of the agency. These resources also include information technology services, human capital services, financial management and administrative support.

#### **Offsetting Receipts:**

The fees collected by the NRC for the Freedom of Information Act (FOIA) and Indemnity (financial protection required of licensees for public liability claims of 10 CFR Part 140) are subtracted from the budgeted resources amount when calculating the 10 CFR Part 170 professional hourly rate per the guidance in OMB Circular A-25 "User Charges." The budgeted resources for FOIA activities are allocated under the product for information services within the Corporate Support business line. The indemnity activities are allocated under the licensing actions and the Research and Test Reactors products within the Operating Reactors business line.

### **Estimated Annual Mission Direct FTE Productive hours:**

Also referred to as the productive hours estimation, reflects the average number of hours that a mission-direct employee spends on mission-direct work in a given year. This excludes hours charged to annual leave, sick leave, holidays, training and general administration tasks. The productive hours is calculated using actual time and labor data in HCM Cloud (minus support and supervisory staff).

Elements of the formula are defined as follows:

- Mission Business Lines. The Operating Reactors, New Reactors, Nuclear Materials Users, Fuel Facilities, Spent Fuel Storage and Transportation, and Decommissioning and Low-level Waste Business Lines.
- Hours in Mission Business Lines. Hours charged to cost accountability codes for missiondirect work.
- **Other Hours**. Includes hours charged to annual leave, sick leave, holidays, etc., and hours charged to cost accountability codes for training and general administrative tasks.
- Hours in a Work Year. 2,087 hours is used to be consistent with OPM guidance on computing hourly rates of pay and the Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272, April 7, 1986).

#### DETERMINATION OF PROFESSIONAL HOURLY RATE CALCULATION OF FTE RATES BY PROGRAM

This is for the purpose of convert	ing FTE to \$.		(1) Total	(2) Total	(2)/(1) <b>FTE</b>
PROGRAM			FTE	S&B (\$):	Rate (\$)
NUCLEAR REACTOR SAFETY	(Less Excluded Activities)		1,723	392,888	228,091
		Excluded Activities	85	20,917	247,240

### Service Fees

### Section III.A.2

Flat application fees are calculated by multiplying the average professional staff hours needed to process the licensing actions by the proposed professional hourly rate (\$321 for FY 2024). The agency estimates the average professional staff hours every other year as part of its biennial review of fees which was performed in FY 2023.

Full cost fees are determined based on the professional staff time and appropriate contractual support of services. The full cost fees for professional staff time will be determined at the professional hourly rate in effect the time the service was provided.

The NRC estimates the amount of 10 CFR Part 170 fees for each fee class based on established fee methodology guidelines (42 FR 22149; May 2, 1977), which specified that the NRC has the authority to recover the full cost of providing services to identifiable beneficiaries. The NRC uses these established guidelines to apply the most current financial data and workload projections by offices and divisions to calculate the 10 CFR Part 170 fee estimates. Current financial data includes: 1) four quarters of the most recent billing data (professional hourly rate invoice data); 2) actual contractual work charged (prior period data) to develop contract work estimates; and 3) the number of FTE hours charged, multiplied by the NRC professional hourly rate.

The application fees and amendment fees are the same for each subcategory because, per

discussion with IP representatives, the processing time is the same for a new license or an

amendment to the license.

Rounding: <\$1000 rounded to nearest \$10,

=or>\$1000 and <\$100,000 rounded to nearest \$100,

=or>\$100,000 rounded to nearest \$1,000

\* In accordance with the Commission's substantive fee policy decision for FY 2022, fees will not be assessed for import and exporting licensing activities (see fee categories K.1. through K.5. of § 170.21 and fee categories 15.A. through 15.R. of § 170.31) under this proposed rule.

### Reciprocity Fees - Agreement State Licensees

### Section III.A.2

The application fee for Agreement State licensees who conduct activities under the reciprocity provisions of 10 CFR 150.20 is determined using FYs 2017 through 2021 data and the FY 2023 professional hourly rate. The FYs 2017-2021 reciprocity fee data was provided as part of the FY 2023 biennial review of fees.

Total	24%	76%	26%	74%

NRC will report fees collected for the prior fiscal year, by fee class, beginning with the FY 2018 final fee rule workpapers. Each fee class data includes distribution of fees collected as user fees (10 CFR Part 170) and annual fees (10 CFR Part 171).

# 10 CFR Part 171 Annual Fees

Section III.B

# Application of LLW Surcharge

## Section III.B.1

## Table IV

Separately, the NRC has continued to allocate the low-level waste (LLW) surcharge based on the volume of LLW disposal of three classes of licensees, operating reactors, fuel facilities, and materials users.

#### Mission Direct Budgeted Resources Allocated to Generic Low Level Waste Surcharge Category

#### Low-Level Waste Surcharge for FY 2024 Proposed Fee Rule

# 1. Percentages to allocate remainder of Generic Low-Level Waste resources to Power Reactors, Fuel Facilities, and Materials

DOE's Manifest Information Management System (MIMS) database was used to determine a 5-year average (Calendar Years 2018 – 2022) based on the DOE MIMS Class. The following were the results as of 03/13/2023:

Power Reactor:	73.3%
Fuel Facilities:	8.8%
Materials:	17.9%

87% of the Materials portion from the above distribution is allocated to Oversight of Agreement States (AS) off-fee base category. This results in the following distribution:

Power Reactor:	73.3%
Fuel Facilities:	8.8%
Materials (NRC):	2.3%
Materials (AS):	15.6% *Allocate to Oversight of AS Fee Relief Category

To adjust the above Power Reactor, Fuel Facilities, and Materials (NRC) percentages, the percentages are divided by the total of the remainder after the AS portions were removed (100% - 15.6% = 84.4%).

Power Reactor	73.3%/84.4% = 86.9 <b>%</b>
Fuel Facilities	8.8%/84.4% = 10.4 <b>%</b>
Materials (NRC)	2.3%/84.4% = 2.7 <b>%</b>

## **Operating Power Reactors**

## Section III.B.2.a

### Table VI

In FY 2024, the NRC proposes to collect \$515.9 million in annual fees from the operating power reactors fee class. The fee-recoverable budgeted costs are divided equally among the 94 licensed operating power reactors. This results in a FY 2024 proposed annual fee of \$5,488,000 per operating power reactor. Additionally, the NRC estimates that each licensed operating power reactor will be assessed the FY 2024 spent fuel storage/reactor decommissioning proposed annual fee of \$330,000. The NRC estimates that the combined FY 2024 proposed annual fee for each operating power reactor will be \$5,818,000.

**Note:** In FY 2016, the NRC amended 10 CFR 171.15 to establish a variable annual fee structure for light-water reactor (LWR) small modular reactors (SMRs) (81 FR 32617; May 24, 2016). In FY 2023, the NRC further amended part 171.5 to: 1) expand the applicability of the SMR variable fee structure to include non-LWR SMRs; and 2) establish an additional minimum fee and variable rate applicable to SMRs with a licensed thermal power rating of less than or equal to 250 megawatts-thermal (MWt) (88 FR 39120; June 15, 2023). This revision to the SMR variable annual fee structure retained the bundled unit concept for SMRs and the approach for calculating fees for reactors, or bundled units, with licensed thermal power ratings greater than 250 MWt. Currently, there are no operating SMRs; therefore, the NRC will not assess an annual fee in FY 2024 for this type of licensee.

The budgetary resources allocated to Power Reactors Fee Class from Nuclear Materials & Waste Safety Program include (but are not limited to) activities pertaining to analysis, data collection, fuel safety, modeling future strategies for disposal of spent fuel and high level waste and monitoring developments in the evolving national waste management strategy. In addition to state liasion, tribal program activities, dosimeter costs and materials training widely attended by all agency staff including inspectors benefitting numerous facets of the agency's mission.

Section III.B.2.b

## Table VII

For FY 2024, budgeted costs of approximately \$40.9 million for spent fuel storage/reactor decommissioning are to be recovered through annual fees assessed to part 50 power reactor licensees, and to part 72 licensees who do not hold a part 50 license. Those reactor licensees that have ceased operations and have no fuel onsite are not subject to these annual fees. The required annual fee recovery amount is divided equally among 124 licensees, resulting in a FY 2024 annual fee of \$330,000 per licensee.

## **Fuel Facilities**

Section III.B.2.c Table VIII Table IX Table X

The FY 2024 budgeted cost to be recovered in the annual fees assessment to the fuel facility class of licenses [which includes licensees in fee categories 1.A.(1)(a), 1.A.(1)(b), 1.A.(2)(a), 1.A.(2)(b), 1.A.(2)(c), 1.E., and 2.A.(1), under §171.16] is approximately \$24.9 million. This value is based on the full cost of budgeted resources associated with all activities that support this fee class, which is reduced by estimated 10 CFR Part 170 collections and adjusted for allocated generic transportation resources, and the low-level waste surcharge.

Limited Operations	Centrus ACP (SNM-2011)	70-07004	1A(2)(a)	1	1	1	10	0	0	0	0	0	0	0	0	0	0	1	1	0	0	0	10	3	22	25	NRC authorized Centrus ACP to begin its HALEU demonstration program operations at the Cat II level on September 21, 2023. This change in operations causes the SG effort factor for "Scrap/Waste" to increase from 0 to 1 and the SG factor for both "Enrichment" and "Sensitive Information increases" from 5 to 10. Therefore the SG total increased from 11 to 22. The S total remained the same so overall total increased from 14 to 25.

## **Uranium Recovery Facilities**

Section III.B.2.d

Table XI Table XII Table XIII Table XIV

The total FY 2024 budgeted cost to be recovered through annual fees assessed to the uranium recovery class [which includes fee categories 2.A.(2)(a), 2.A.(2)(b), 2.A.(2)(c), 2.A.(2)(d), 2.A.(2)(e), 2.A.(3), 2.A.(4), 2.A.(5) and 18.B., under § 171.16], is approximately \$325,000 (rounded).

Of the required annual fee collections, \$271,000 is assessed to DOE's Uranium Mill Tailings Radiation Control Act (UMTRCA) under fee category 18.B. The remaining \$54,300 (rounded) would be recovered through annual fees assessed to the other licensees in this fee class (i.e., conventional mills, in-situ recovery facilities, 11e.(2) mill tailings disposal facilities (incidental to existing tailings sites.)

## **Non-Power Production or Utilization Facilities**

## Section III.B.2.e

## Table XV

Approximately \$293,000 in budgeted costs is to be recovered through annual fees assessed to the non-power production or utilization facilities (NPUF) class of licenses for FY 2024. This required annual fee recovery amount is divided equally among the three NPUF licensees subject to annual fees, and results in a FY 2024 annual fee of \$97,700 for each licensee.

# **Rare Earth Facilities**

## Section III.B.2.f

During FY 2021 NRC did receive an application under the Rare Earth fee class 2.A. (2)(f). However, only 10 CFR Part 170 FY 2024 budgetary resources were allocated to this fee class and did not require an annual fee to be established.

NRC revised the fee category for this fee class from 2.A.(2)(c) to 2.A.(2)(f) in FY 2009.

NRC eliminated fee category 2.A.(5) Uranium Water Treatment Facility effective with the FY 2019 Fee Rule.

# 10 CFR Part 171 Annual Fees

# **Materials Users**

### Section III.B.2.g

### Table XVI

The following fee categories under §171.16 are included in this fee class: 1.C., 1.D., 1.F., 2.B., 2.F., 3.A. through 3.S., 4.A. through 4.C., 5.A., 5.B., 6.A., 7.A. through 7.C., 8.A., 9.A. through 9.D., 16, and 17. The annual fee for these categories of materials users licenses is developed as follows:

Annual fee = Constant x [Application Fee + (Average Inspection Cost/ Inspection Priority)] + Inspection Multiplier x (Average Inspection Cost / Inspection Priority) + Unique Category Costs.

To equitably and fairly allocate the \$46.2 million in FY 2024 budgeted costs to be recovered in annual fees assessed to the approximately 2,400 diverse materials users licensees, the NRC continues to calculate the annual fees for each fee category within this class based on the 10 CFR Part 170 application fees and estimated inspection costs for each fee category. Because the application fees and inspection costs are indicative of the complexity of the material license, this approach provides a proxy for allocating the generic and other regulatory costs to the diverse fee categories. This fee calculation method also considers the inspection frequency (priority), which is indicative of the safety risk and resulting regulatory costs associated with the categories of licenses.

# 10 CFR Part 171 Annual Fees

## Transportation

Section III.B.2.h

Table XVII Table XVIII

Consistent with the policy established in the NRC's FY 2006 final fee rule, the NRC will recover generic transportation costs unrelated to DOE as part of existing annual fees for license fee classes. NRC will continue to assess a separate annual fee under §171.16, fee category 18.A., for DOE transportation activities.

The resources associated with generic transportation activities are distributed to the license fee classes based on the number of Certificates of Compliance (CoCs) benefiting (used by) that fee class, as a proxy for the generic transportation resources expended for each fee class. The amount of the generic resources allocated is calculated by multiplying the percentage of total CoCs used by each fee class (and DOE) by the total generic transportation resources to be recovered.

#### TRANSPORTATION ANNUAL FEES

#### FY 2024

The total transportation budgeted costs of \$9,701,454 to be recovered from annual fees (not including fee-relief adjustments) is to be obtained from two sources:

1. Department of Energy (DOE)--has own annual fee (fee category 18A)

2. Other licensees (included in their annual fees)

Distribute these costs to DOE and the fee classes based on the percentage of CoCs benefitting (used) per fee class:

Fee Class	# CoCs		% CoCs	Transportation Resources to be included in annual fees	Resources in Millions
DOE		21.0	22.2%	\$2,156,247	\$2.2
Operating Reactors		6.0	6.4%	\$616,070	\$0.6
Spent fuel/reactor decom		19.0	20.1%	\$1,950,890	\$2.0
NPUF		0.5	0.5%	\$49,683	\$0.05
Fuel Facilities		24.0	25.4%	\$2,464,282	\$2.5
Materials Users		24.0	25.4%	\$2,464,282	\$2.5
T	otal	94.5	100.0%	\$9,701,454	\$9.7

# **Regulatory Flexibility Analysis**

## Section IV.

The Regulatory Flexibility Act (RFA), as amended 5 U.S.C. § 601 *et seq.*, requires that agencies consider the impact of their rulemakings on small entities and, consistent with applicable statutes, consider alternatives to minimize these impacts on the businesses, organizations, and government jurisdictions to which they apply.

Additionally, the Small Business Regulatory Enforcement Fairness Act (SBREFA) requires all Federal agencies to prepare a written compliance guide for each rule for which the agency is required to prepare a regulatory flexibility analysis. The NRC, in compliance with the law, prepared the "FY 2023 Small Entity Compliance Guide" for the FY 2023 fee rule. The compliance guide was developed when the NRC completed the small entity biennial review for FY 2023. The NRC plans to continue to use this compliance guide for FY 2024 and has relabeled the compliance guide to reflect the current FY.

Licensees may use this guide to determine whether they qualify as a small entity under NRC regulations and are eligible to pay reduced FY 2024 annual fees assessed under 10 CFR Part 171. The NRC has established two tiers of annual fees for those materials licensees who qualify as small entities under the NRC's size standards.

**Budget Authority (FY 2024)** 

The table below delineates where the *major* portion of a Business Line's direct budgetary resources are allocated when calculating 10 CFR Part 171 fees for a license fee class. The indirect portion of a Business Line (e.g. Training, Travel, Mission Support and Supervisors), as well as Corporate Support and Inspector General budgetary resources, are distributed among all license fee classes.

UNCOUNTAEN OF DOUMEOU	
Business Line	License Fee Class

#### CROSSWALK OF BUSINESS LINES' ALLOCATION TO FEE CLASSES\*

\*Delineates where the major portion of a Business Line's direct budgetary resources are allocated for a license fee class. Does not include fee-relief allocation. NRC does not have licensees under the Rare Earth fee class.

More information about 10 CFR Part 170 and 10 CFR Part 171 can be found at NRC's public website: <u>http://www.nrc.gov/about-nrc/regulatory/licensing/fees.html</u>.

# **Budget Authority (FY 2024)**

# FY 2024 Budget Summary by Program

This report is provided as supplemental information. It provides a summary of the FY 2024 budgeted FTE and contract dollars allocated to each fee class and fee-relief/surcharge activities at the Program level. The Programs include: 1) Nuclear Reactor Safety, 2) Nuclear Materials & Waste Safety, 3) Corporate Support, and 4) Inspector General.
