Contractor: The contractor that performed work.

1 Invoice Period: More clearly-defined Billing Period.

Page Break

CAC (Cost Activity Code): CACs are now standardized and reusable, allowing the same code to be used on a number of projects for the same type of work. CACs are no longer specific to a project or site.

EPID Total: Total of all charges under the EPID for the invoice period. The EPID allows the grouping of costs for a single project so that costs are no longer commingled within the invoice for multiple projects.

Additional Information:

* The EPID project code is a new data element that is being introduced on the invoices for this billing cycle. Inconsistent naming may appear in the EPID title concerning the type of work performed and the docket facility. Going forward, the NRC will be evaluating the structure and format of the Project Title identified for the EPID and will be developing a standardized format for easier identification and recognition.
