New NRC Resident Inspector Assigned to Limerick Nuclear Power Plant

Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Sherlyn Haney as the new resident inspector at the Limerick Generating Station in Limerick, Pa. She joins NRC Senior Resident Inspector Scott Rutenkroger at the two-unit site operated by Exelon Nuclear.

Haney joined the NRC in 2007 after graduating from Drexel University with a bachelor's degree in mechanical engineering. She has served as a project engineer in the Region I Division of Reactor Projects and, most recently, was a resident inspector at the Hope Creek Generating Station in Hancock's Bridge, N.J.

Each U.S. commercial nuclear plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting inspections, monitoring major work projects and interacting with power plant workers and the public. Resident Inspectors can be assigned to any one site for up to seven years.
