## **NRC Announces Use of Electronic Mailing Listserv for Fuel Cycle Facility Correspondence**

The Nuclear Regulatory Commission is now distributing publicly available fuel cycle facility correspondence originating from the agency's headquarters in Rockville, Md., and the Region II office in Atlanta through an electronic mailing Listserv system.

Correspondence related to operating reactors, decommissioning reactors and select waste programs is already available through an electronic distribution process. The process distributes public documents generated by the NRC staff to those registered to receive Listserv communications. The Listserv does not provide notice of documents generated by external parties, or NRC documents that contain proprietary, security-related, safeguards, or other information that is withheld from public disclosure.

Individuals who would like to receive licensing and inspection correspondence for fuel cycle facilities should go to the [NRC website](#). To access the Listserv from the NRC [homepage](#), select "Email Updates" at the top of the page, next select "Fuel Cycle Facilities Correspondence" under the heading "Lyris Subscription Services." To complete the process, an email address should be entered, the facility or facilities of interest should be selected and lastly, individuals must click the "Subscribe" button to be added to the list.

Each subscriber will receive an email confirmation with instructions for managing the NRC Listserv subscription and will be responsible for ensuring their email address is current.
